NEW SMART TV

The “Features To Look For In Your New Smart TV” article published under eStyle section in April issue is quite interesting. Please publish more articles on different makes of smart TVs with features and prices.

EFY. Thanks for the feedback! We have noted your request.

PLANT WATERING SYSTEM

I am interested in building a plant watering system. Please share the list of related projects published in EFY.

Mahig

Through email

EFY. You may refer to “Automatic Plant Watering System With Melody” DIY project published in January issue.

You can get the back issues of EFY from online stores like magzter.com and ezine.efymag.com

AUDIO SPLITTER AND MIXER

Please let me know about DIY projects on multiple audio signal splitters and mixers that have recently been published in EFY.

Anirvan Kule

Kolkata

EFY. You may refer to “Audio Mixer With Multiple Controls” and “Mixer and Preamplifier for String Instruments” DIY projects available on our website, as follows:

<https://electronicsforu.com/electronics-projects/audio-mixer-multiple-controls>

<https://electronicsforu.com/electronics-projects/mixer-and-preamplifier-for-string-instruments>

We have not published any projects on audio signal splitters recently.

Electronics Projects

The “Audio Noise Limiter” DIY project available on your website, <https://electronicsforu.com>, is superb!

Manu Prasad

EFY. Thanks for the feedback!

In “Lossless Image Compression Using MATLAB” DIY project available on your website, <https://electronicsforu.com>, the program is able to compress the image file but not display the uncompressed and compressed images in the figure window. It is displaying only the size of the uncompressed images. Please help.

Karthik

EFY. Problem could be the MATLAB version mismatch. It was tested on MATLAB13a. Please make sure that the image files are included in the same folder where the source code is located.

The “Electronic Combination Lock” DIY project available on your website, <https://electronicsforu.com>, is a good one. Thanks!

John Doe

☐ In “Electronic Combination Lock” DIY project, what if a wrong

sequence is pressed?

B. Mani Harika

EFY. Thanks for the feedback! If a wrong sequence is pressed, pin 10 of IC1 will remain low, transistor T2 will not conduct and the lock will remain closed.

The “World’s Top 25 Robotics Project Ideas” section on your website, <https://electronicsforu.com>, is fantastic!

Shivani Verma

EFY. Thanks for the feedback!

The “World’s Top 25 Electrical Engineering Project Ideas” section on your website, <https://electronicsforu.com>, is amazing! It has helped me a lot in my final-year project.

Shweta Pawar

EFY. Thanks for the feedback!

This is regarding “25 Awesome Mini Projects For Engineers” section available on your website, <https://electronicsforu.com>. I love the idea of mini-projects discussed there. It has given me many ideas for my mini-projects. Please keep posting such articles.

Brandon Lawrence

EFY. Thank you for your feedback!

Through MATLAB GUI” DIY project, how can I control the device?

Kirti

Through email

The author Shibendu Mahata replies:

A possible loose connection at the receiver end will cause the circuit to malfunction. More information is required like voltages at various test points in the circuit when GUI button is clicked.

Movement of the car can be controlled from the GUI itself by pressing the appropriate buttons. The code has been written to send the command signals mentioned in the article to the corresponding pins of the ICs.

WIRELESS ROBOTIC CAR

I am facing problem with “Wireless Control Of Robotic Car Through MATLAB GUI” DIY project published in January issue. After I assemble the circuit, burn the code into Arduino, plug in the battery and click on Forward command using a mouse, the robot starts moving. But when I send Stop command, the robot keeps going forward until I unplug and then plug in the battery again. I have tried everything and changed all ICs except L293D, but without success. Please help.
