Did you know that if you were to have your picture taken by the very first camera you would need to sit still for eight hours, as per www.thefactsite.com. If so, technology has brought us a long way! I. Want. It. Now.

To showcase the latest technology and the latest gadgets, Europe is getting ready for IFA 2019, which is to be held in Berlin from September 6 to 11 this year. A preview of the show was held recently for the global press with grand fanfare at IFA Villa, which was set up at Punta Umbria Beach Resort in Andulasia, Spain.

On show in Andulasia were Ambeo 360-degree surround sound bar from German audio company Sennheiser, home appliances from European company Haier, an 8K UHD TV from Chinese company Hisense, Android OLED TVs from Metz in Germany (now owned by Chinese display maker Skyworth) and a safety device from a startup, called Safera Sense, which can be installed above a stove to monitor air quality and temperature.

Market leader Philips Personal Health DACH's Marlies Gebetsberger outlined how her company is innovating in the field of data-driven insights into health. Philips Sonicare Teledentistry service, for instance, provides patients with remote dental consultation from licensed dentists within 24 hours. Philips Sonicare app

Philips S7000, world's first personalised shaver

80 years of shaving expertise
1939: Launch of the world's first electric rotary shaver
2019: One billion male grooming products sold

AI-powered shaving solution
The world's only shaver with personal shave plan and real-time personalized guidance

For sensitive skin
Co-developed with dermatologists, it helps tackle specific skin issues

acts as a virtual hub for personal oral healthcare. Users can manage their complete oral care daily and share brushing data with their doctors, putting personalised guidance and advice at their fingertips.

Chinese brand TCL's Marek Maciejewski, product development director,

TCL Europe, said that their company is aiming to be among the top three in Europe for audio and air-conditioning by 2022. New TCL TVs will feature mini-LED in 1000 zones—that is 20,000 LEDs—while their super-slim TVs are less than 1cm thick. In July, TCL Europe will launch its first ranges
