

of headphones—four in total—as well as a standalone sound bar.

While IFA has always been visionary, ever since the days when Albert Einstein addressed the event, it is also the ultimate showcase ground for audio technologies. That is why IFA and Sennheiser announced their official audio partnership at the IFA global press conference.

Connectivity, artificial intelligence (AI), voice control and 5G are the big trends driving innovation for consumer electronics and home appliances in this new era, and these will all be on show across the whole network of global IFA events this year—from the world's largest technology show, IFA Berlin, to IFA events like CE Week in June in New York and CE China in Guangzhou in September.

The world is obviously moving from an industrial society to a super smart society, Society 5.0. Society 4.0 is the current Information Society, while Society 3.0 was the industrial society. Before that we had Society 2.0—the agrarian society, and Society 1.0—the hunting society.

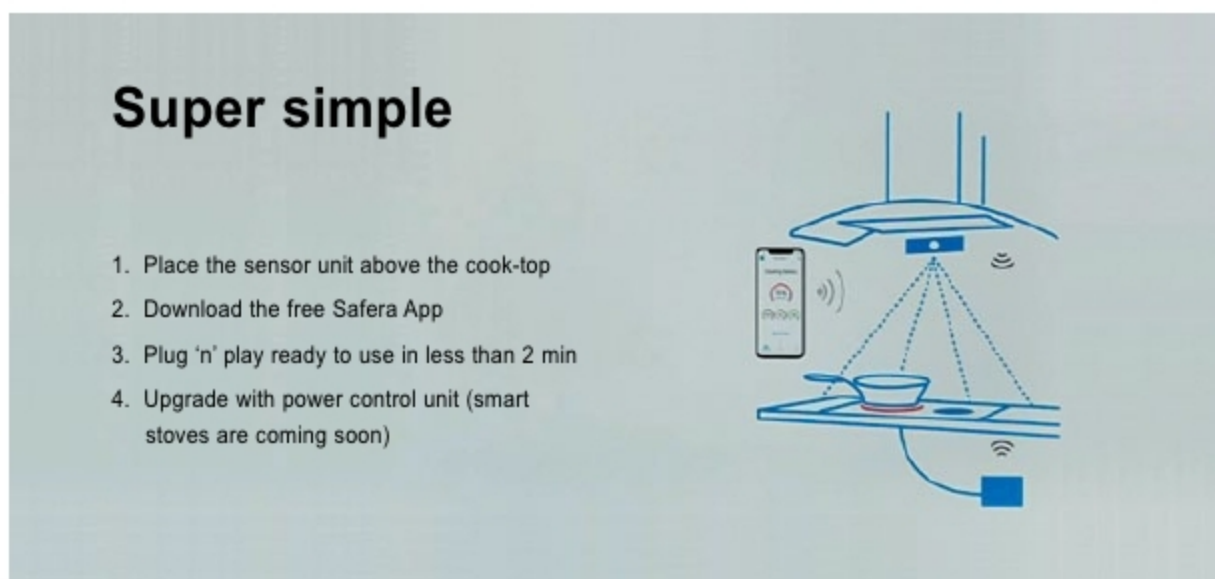

However, many people feel that they are being left behind by the fast pace of innovation. According to Year 2019 Edelman Trust Barometer (survey), as many as 47 per cent of people believe that technological innovations are happening too quickly and are leading to changes that are not good for people like them.

Fears of job-loss due to technology also remain high. As per this 19th Annual Edelman Trust Barometer, 59 per cent of people do not have the training and skills necessary to get a good-paying job. And 55 per cent people think that automation and other innovations are taking their job away.

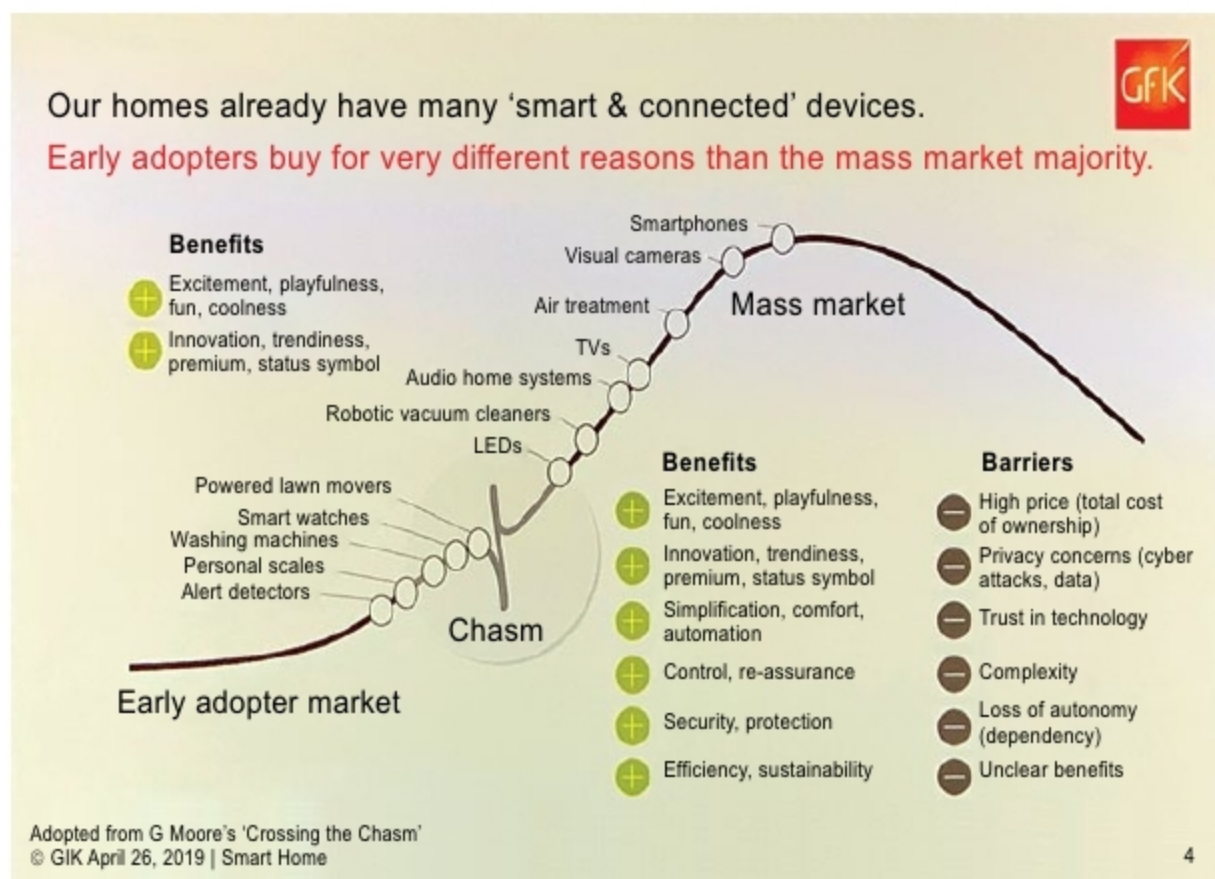

Trust is one of the biggest issues facing the technology industry in 2019, and Margot Edelman, vice president in the Silicon Valley office of Edelman, the world's largest public relations firm, pointed out the increasing trust factor in technology. While trust in business in general, Blockchain and self-driving cars is low, trust in technology in general, and in artificial intelligence, the Internet of Things and healthcare technology is growing. In fact, according to
