When you use horizontal arrangement, all components will be arranged horizontally, or left-to-right fashion.

There is one vertical and five horizontal arrangements in this project.

Vertical arrangement. Select VerticalArrangement component from the left side and drag it to Viewer window (Fig. 5). To do that, go to Palette window, where you will see User Interface. Scroll down and select Layout→VerticalArrangement. Click and hold it, and then drag it over the cellphone-shaped Screen1 box.

Go to Properties of VerticalArrangement1 at the top-right, and select the height and width, as shown in Fig. 6.

First horizontal arrangement. Select Palette→Layout→HorizontalArrangement. Drag it over the vertical layout. Go to Properties and select both Align Horizontal and Vertical as Center, Height as 50 pixels and Width as Fill Parent.

ListPicker. This button is used to display the list of devices/items available in Bluetooth devices. It also handles the selection.

Select Palette→User Interface→ListPicker. Drag it over HorizontalArrangement layout. Go to Properties of ListPicker and change the following parameters:

- Background colour: light grey
- Font bold (check)
- Font size: 14.0
- Height: 60 pixels
- Width: 50 per cent
- Text: Available Bluetooth Devices
- Text alignment: centre

Note: You can rename ListPicker1 or other components from Components window using Rename option.

Label. This option is used to show the connected Bluetooth Device. Select Palette→User Interface→Label. Drag it over HorizontalArrangement1 layout. Go to Properties of HorizontalArrangement1 and change the following:

- Background colour: light grey
- Height: 50 pixels
- Width: 50 per cent
- Text: Connected Device Will Show Here
- Text alignment: centre

Second horizontal arrangement. Go to Palette→Layout→Horizontal
