MrOwl introduces Social Cloud Storage platform

MrOwl, the Social Cloud Storage platform, has announced the rollout of free, unlimited cloud storage for content that is shared with the world. MrOwl gives users the capability to simply store their files once and search them infinitely from anywhere at any time. With just a few clicks, users can upload gigabytes of data that is automatically organised, and made shareable and searchable. By providing one platform that allows users to access their digital lives all in one place, MrOwl's unlimited free cloud storage aims to solve many of consumers' Internet search frustrations.

Dhandha, a cloud-based multilingual GST app

AcTouch Technologies has launched Dhandha, which is India's first multilingual, free GST mobile app. The app is available in multiple languages like English, Hindi, Kannada, Tamil, Gujarati, Punjabi and Marathi. The multi-language feature solves language barriers, allowing users to select the language of their choice to prepare invoices. The app provides GST-compliant invoicing and billing, GST details, and managing and tracking of bills, payments, receipts and reports. Its best feature is the interface to Tally software for accounting entries. Tally allows exporting of bills and invoice details in Excel, which can be shared with chartered accountants for tax compilation and auditing. The app promises bank-level data security, with the highest level of data encryption. The app is focussed on consultants, small business owners, small manufacturing companies, freelance professionals and so on.

Data analytics, AI and ML to spot wildlife species across India

WildTrails, a wildlife sighting app, gives details of sightings of all species across most of the top national parks and reserves in India. It gives complete details of sightings of all species through data analytics, artificial intelligence (AI) and machine learning (ML) to deliver a personalised experience for wildlife travellers. The app shows users the sightings index for a given species within a given time frame. Based on this, they can book packaged tours for that sanctuary. The app also reveals where and how recently big cats were spotted in various parks in India.

DenTrack, an end-to-end trade marketing tool

Denave unveils its proprietary sales process automation tool for trade marketing activities, DenTrack. Designed primarily to address business challenges encountered while planning and executing trade promotional activities, DenTrack is an end-to-end integrated solution offering complete visibility to all stakeholders on sales, funds, coverage and brand advocacy of the channel ecosystem. Available in both Web and mobile interfaces, DenTrack provides a real-time market and competition stand that helps define a marketing strategy via 360-degree information capture mechanism and in-depth analysis. It is a holistic workforce process automation tool, fully-integrated with relevant HR systems while facilitating real-time field force tracking, driving last-mile visibility of trade marketing activities and its impact on sales.

The prices, features and specifications are based on information provided to us, or as available on various websites and portals. EFY cannot vouch for their accuracy.

"This new technology is strange. My right-side sensors are powered by solar light, while the left-side ones are nano and are powered by the nearby star, Pulsar!"

"Efforts reflect results. Since I gave speeches only via video and won the election, the party has made me electronics and communication minister."
