

Power guard

MECO-G has introduced a new multi-function power guard that can measure watts, kWh, volts, ampere, time in minutes, power factor. It is a useful instrument for measuring power consumed and testing of appliances like air-conditioners, mixers, grinders, washing machines, microwave ovens, ovens, dish washers, dryers, printers, computers, LED lights, tubelights, soldering stations and many other appliances and equipment.

Digital multimeter

Model 603 Junior is a 2000-counts manual ranging digital multimeter with LCD backlight having voltage range up to 1000V DC and 750V AC, and current range up to 10A DC and AC. Basic accuracy for DC voltage is $\pm 0.5\% \text{rdg} + 5\text{dgt}$, for AC voltage is $\pm 1.2\% \text{rdg} + 10\text{dgt}$, for DC current is $\pm 1.0\% \text{rdg} + 5\text{dgt}$ and for AC current is $\pm 3.0\% \text{rdg} + 2\text{dgt}$. It can also measure resistance up to $20\text{M}\Omega$.

Multi-sensor platform

ON Semiconductor continues to enable battery-less and maintenance-free IoT with the introduction of its RSL10 multi-sensor platform powered solely with a solar cell. This complete solution sup-

ports the development of IoT sensors using continuous solar energy harvesting to gather and communicate data through Bluetooth Low Energy, without the need for batteries or other forms of non-renewable energy.

Photoelectric sensors

Rugged connector and component manufacturer Bulgin has launched a slimline range of photoelectric sensors.

Designed specifically for manufacturing automation and industrial automation proximity-sensing operations, SL series sensors offer manufacturers a cost-effective and flexible solution for the implementation of the Industrial IoT (IIoT).

SOFTWARE

Security solution

Renesas Electronics has announced plans to release a security solution based on Renesas RZ/G Linux platform that will reduce the amount of time required for users to obtain certification under IEC 62443-4-2, a new international standard for security technologies used to protect industrial control systems from cyberattacks.

KiCad library

Digi-Key Electronics announces the release of a new secondary KiCad library, known as Digi-Key Partner Library, on GitHub. This is intended to be a supplement to the existing Digi-Key KiCad library released last year. Whereas the previous library was developed and curated by Digi-Key's

applications engineering team, Partner Library was created to allow manufacturers to submit their own symbols and footprints to be compiled into Digi-Key format.

Door controller

Cosec Door Fot, a well-engineered door controller, can be used for applications like time-attendance and cafeteria management. It records exact time of a user using fingerprint, RF card or PIN as credentials in less than one second. Other features are:

- 128x64 dot matrix display with touch sense keypad
- 500,000 events storage and 50,000 users
- Ethernet, RS-485 and 3G/4G

Power supply

Traco Power has announced the release of its TIB 120-EX family of 120-watt DIN rail power supplies that are designed for harsh environments and hazardous locations with certifications for ATEX II3G and UL HazLoc Class I/Div 2 standards.

Breakout board

TRINAMIC Motion Control launches TMC5160 SilentStepStick. Outpowering all other StepSticks on the market, this tiny breakout board with TMC5160 can drive motors up to 3A phase current at 35V. TMC5160 SilentStepStick is a polulu-sized breakout board that is ideal for upgrading (desktop) CNC machines, water cutters and laser cutters, as well as bigger 3D printers.
