

Smart Workspace

Visit: www.sogeti.com

Full version: Paid

It meets the organisational needs for a standardised, tightly-controlled and secure workplace that is easy to manage. At the same time, end users can use their own devices to do what they need to do, wherever they are. They can work from anywhere with enhanced mobility solutions, keeping them connected and productive. It provides better control of budgets with a pay-per-use model, and allows users to seamlessly integrate new tools and future service capabilities with legacy systems, delivered via the cloud or in-house on-premises platforms.

Download: Full version (free)

The app allows users to remotely control multiple home appliances or devices from anywhere. It supports voice control via Amazon Echo and Google Home, and allows internetworking of multiple smart devices and auto control based on temperature, location and time. Devices can be easily shared among family members, too. The app enables setting up the timer to easily perform multiple functions.

Android

or smoke is detected. Users can see who is at the front door and use the phone to unlock it from anywhere.

Smart Home Solution

Updated: Feb 2019

Platforms: Android 4.1 and above

Download: Full version (free)

It provides a live camera view of the home with the option of privacy mode in case family members are at home. In case of burglary, water leakage or a fire, there is an automatic alarm feature. The app has a smart alarm chain with in-app notifications, text messages, calls and optional police emergency calls. It has adjustable security levels using either all or selected sensors with regular security updates. The app has heating and lighting control options, too.

Android

applications running on the server. For example, applications can use accelerometer data to drive 3D modelling applications, use ambient light levels to control brightness of the screen, use location data to alter behaviour of applications and so on.

Android

SmartAppCity

Updated: April 2019

Platforms: Android 4.0.3 and above

Download: Full version (free)

This app is currently being used in Spain to keep users updated about everything that happens in the city. Users can choose between citizen or tourist mode to find useful and updated information. They can access news, notices and municipal publications in real time. The app has information about traffic and parking spaces, gas stations, emergency telephone numbers, online booking section for sports facilities, Wi-Fi zones and a system of suggestions through which users may send queries or report incidents to the City Council.
