Digital camera

Ideal for camera enthusiasts

Fujifilm India has announced its latest offering X-T30, the mirrorless digital camera for the Indian market. In its compact body that weighs just 383 grams, X-T30 features the latest 26.1MP X-Trans CMOS 4 sensor and the fast X-Processor 4 image processing engine to achieve ultimate image quality.

It also offers highly accurate AF performance across the entire frame and silent continuous shooting capability of up to 30fps, ensuring a decisive photo opportunity in a variety of situations. The camera can also record 4K/30P video while applying Film Simulation mode, including Eterna with rich colour grading, based on Fujifilm's proprietary colour reproduction technology. Its ability to record fine and smooth 4K video with high-resolution audio meets the needs of those involved in full-scale video production.

X-T30 provides excellent operability with a grip design that enhances stable grip when holding the camera, a touch-screen panel display with improved response performance and focus lever that facilitates faster focusing operation. The camera is also equipped with auto mode selector lever that allows instant switching to a fully-automatic shooting mode, making it a perfect mirrorless digital camera.

Headphones

With noise-cancelling feature

Ambrane India has unveiled WH-65 headphones that promise a long battery life of up to six hours on a single charge. The headphones feature adjustable ear shells and a comfortable headband. Created from lightweight materials, these are designed to provide maximum comfort while maintaining sturdiness. WH-65 comes with noise-isolation technology that blocks out unwanted sound.

With 32-ohm impedance and 40mm high-intensity neodymium sound drivers, the headphones bring balanced bass-treble and vocals. Apart from a rechargeable 200mAh lithium-ion battery, the device also supports smart power saver mode.

Easy approach buttons make WH-65 a user-friendly device. Skillfully placed on the right cup of the ear are

power on/off buttons, volume, play and pause controls, supported by SD card and AUX slots. The headphones also feature inbuilt FM radio.

Bluetooth 5.0 wireless technology ensures flawless connections with no loss of audio transmission up to 10 metres. It also allows connecting two devices simultaneously, provided both devices support the same version.

Speaker

Featuring impenetrable waterproof protection

SoundCore by Anker has launched Motion Q speaker that brings all-around sound paired with impenetrable waterproof protection for a truly on-the-go experience. An IPX7 waterproof shell seals these off from destructive liquids and potential damage. The waterproof barrier can withstand full immersion in up to one metre of water for 30 minutes.

Motion Q's back-to-back full-range drivers and dual passive radiators deliver music evenly around the room for 360-degree sound. To produce breathtaking depth and clarity, Motion Q utilises exclusive BassUp technology, which enhances the music's bass frequencies in real time.

SoundCore's Anker heritage combines a high-performance lithium-ion battery with Anker's advanced power management system. The pairing is engineered to optimise power consumption, allowing Motion Q to play for longer, up to 10 hours of non-stop listening from a single charge. The speaker also comes with an integrated microphone, to switch between music and calls with ease.

Motion Q's total wireless pairing instantly connects two Motion Q speakers together to create stereo sound.
