A one-handed style browser that needs minimum permissions

OH Web Browser is a one-handed style browser that needs minimum permission requirements, and features an ad blocker, privacy browsing, a download manager and a Web archive converter. In addition, it can read and convert PDF files. The big feature is the one-handed use. User interface (UI) elements are at the bottom of the app, which makes it easier to use it with one hand. Users may need to play with the settings a bit.

An app to convert texts in other languages

Language Navi uses Google Translate API that helps it convert texts in almost any available language. The app accurately converts every text in the app including menus, buttons and text snippets into a language that the user finds comfortable to understand. Simply select the source and target languages. The rest is taken care of by this app.

An app for people with low vision or total blindness

Lookout by Google is a new app for people with low vision or total blindness. It uses the camera sensor to see and identify things. The app then tells the user what these are. Google recommends putting the phone in a shirt pocket or wearing it necklace-style. That way the camera can see what is directly in the front. There is even a read mode where the app reads books, menus, magazines, etc out loud. Currently, it is only available for Pixel devices with Android 8.0 or higher.

Soon, a social bucket list

Soon is a social bucket list that helps users remember, discover and experience things that make life more fun. It helps them keep track of what they want to do next, like movies and TV shows to watch, books to read, places to visit, etc. They can also follow their friends to see things they are adding. Soon is great for sharing recommendations with friends.

The prices, features and specifications are based on information provided to us, or as available on various websites and portals. EFY cannot vouch for their accuracy.

"Doctor, thanks for curing my nano disease! Your fees will be paid in the form of nano smart money via a cellphone."

"Is it correct that last year you smuggled tortoise skin and this year e-skin?"
