

MEDI's Dusk to Dawn Solar Charge Controller

Martin's Electronic Devices & Instruments
Research & Development in Electronics since 1987

→ Dusk to Dawn

Load will automatically switch on during the night and switch off during the day

→ LED Bargraph

LED bar graph for Panel Current, Battery Charge/Discharge level and Load Current

→ External LCD Display

Trickle charging, battery & panel voltage, battery & panel current, load current, total KWH, fault etc

→ Temperature Compensated Batt Charging

Temperature compensated battery charging for Longer battery life and Protection

→ Zero Drop Switching

Panel disconnection from battery during night to avoid reverse battery current flow to the panel. No diode used hence no drop

→ USB Charging Port

USB port for External LCD display / Mobile fast charging with built in 2.5A SMPS

Protections : Panel/ battery reverse, panel over current, battery low cut off, battery deep discharge, high temperature cut off, short circuit/ over load.

* Efficiency > 99.9%

* Maximum panel VOC = 100V

* 12V & 24V auto battery selection

* Manual load on/off control

* Maximum Battery/Panel/ Load Current : 10A & 30A
