

Enabling smart, globally connected cities

Advanced, efficient radar solutions to build intelligent infrastructure

Infineon's industrial radar solutions are key components in many IoT motion sensing applications ranging from smart home security and automation through lighting control to touch-free switches.

The BGT24M/L family is the largest and highest integrated 24GHz ISM band radar transceiver family currently in the market. It saves -30% board space compared to discrete line ups.

Key Benefits:

- › Direction, proximity and speed detection
- › Hidden mounting capability
- › Maintains operation through harsh weather conditions
- › Motion tracking
- › Ghost target suppression
- › Target positioning
- › Adaptable to different application requirements
- › Shop lighting
