

Revolutionizing the HMI of Things

Touch**GFX**

TouchGFX is your free tool for creating cutting-edge industrial and every day products with exclusive graphical user interfaces for your users

TouchGFX is a user-friendly graphical C++ tool integrated in the STM32 ecosystem. With TouchGFX, you can easily create revolutionizing embedded graphical user interfaces (GUIs) with a user-centric look and feel.

KEY POINTS

- Full integration in the STM32 ecosystem
- Free tool
- High-end graphics
- Optimal resource utilization
- Drag & drop GUI builder
- Max UI performance
- Modern GUI features

GRAPHICS ACCELERATION

- Chrom-ART Accelerator™
 - Offloads the main CPU from repetitive graphical operations
 - Enables high-end user interfaces in parallel with real-time processing
 - Offers an efficient font management capability enabling multi-language support with limited memory size impact

DISPLAY INTERFACES

- 8080/6800 parallel interface
 - Ideal for small-sized displays
- LCD-TFT controller
 - For mid-sized displays
 - Supports up to XGA resolution
- MIPI-DSI® controller
 - For new-generation displays with higher pixel density, lower EMI and lower pin count

INTEGRATION AND MEMORY EXTENSIONS

- Up to 2 Mbytes of internal Flash memory, NOR and NAND Flash extensions, and up to 1 Mbyte of internal SRAM
 - Optimum support of up to WQVGA resolutions with no external RAM
- Chrom-GRC™ «unsquares» round displays and saves 20% RAM memory resources
- SDRAM and PSRAM extensions
 - Enabling up to XGA resolution with support through memory extensions

STMicroelectronics Pvt Ltd

Plot No 1, Knowledge Park III,
Greater Noida 201308, Uttar Pradesh, India
