word associated with the e-mail ID.

3. In receiver field, type the e-mail ID where you want to receive the

email regarding the status of the sensor.

Then, save the changes and run

the code. Whenever the sensor detects an object from a distance of 50cm—you can change this from the code—a message will be sent to the configured e-Mail ID from the sender, Raspberry Pi. This action will be shown on the terminal, as shown in Fig. 3. The e-Mail received on the receiver e-Mail ID is shown in Fig. 4.

Select Less Secure Apps option under Gmail settings to access the alerts. **EFY**
