

Industrial robotics market expected to have highest growth by 2024

The industrial robotics market is projected to reach a revenue of over US\$ 80 billion by 2024. Rapid growth of the industrial sector across the world and high adoption rate of automation technologies as a part of the manufacturing process are the major factors propelling the industry growth during the forecast timeframe.

Segmentation of the industrial robotics market by product indicates

that collaborative robots are expected to have the highest growth rate over the forecast timeframe. These have a large work envelope and high usage as these allow employees to work alongside and are priced significantly lower as compared to their counterparts. Additionally, adoption of the collaborative industrial robotics market decreases human idle time by 85 per cent and substantially boosts the efficiency of the overall manufacturing process.

Fibre-optic test equipment market to grow at 5.6 per cent in 2019

On the back of constant deployment of fibre into the networks by cable operators, sale of fibre-optic test equipment is estimated to grow at a rate of 5.6 per cent in 2019, according to a latest report by Future Market Insights.

In 2018, fibre-optic test equipment sale crossed 1.2 million units as the equipment gained vital importance in recent years, the report says.

The fibre-optic test equipment market is likely to grow at a CAGR of

more than six per cent through 2027, in terms of volume, it adds.

There has been a constant search for equipment that are simple to operate, irrespective of the intensity of exposure of cable deployment crews to optical networking. Evolution in the design and development of these equipment continues in accordance with complicating test issues related with advancements in optical networks.

On The Move

IESA appoints Jitendra Chaddah as chairman

India Electronics and Semiconductor Association (IESA), the premier industry body representing the Indian Electronic System Design & Manufacturing (ESDM) industry has announced its new executive council for the year 2019-20 with Jitendra Chaddah (JC), senior director - operations and strategic relations, Intel, taking over as chairman.

Tata Communications appoints Pathmal Gunawardana as Americas chief

Tata Communications has named Pathmal Gunawardana as head of Americas. In his new role, Gunawardana will be responsible for accelerating customer adoption of Tata Communications' hybrid WAN, cloud enablement and business collaboration services across North and South America.

Twitter appoints Manish Maheshwari as India MD

Twitter has appointed Manish Maheshwari as managing director of its India operations. Last year, Taranjeet Singh had stepped down as India country director and Balaji Krish was given charge of leading the country's operations in the interim period.

Corporate funding in solar sector up 10 per cent in Q1 of 2019

Global corporate funding, including venture capital (VC) funding, public market and debt financing into the solar sector recorded a year-on-year increase of 10 per cent in the first quarter of 2019, according to a latest report by Mercom Capital Group.

Overall corporate funding into the solar sector in the given quarter was US\$ 2.8 billion as compared to US\$ 2.5 billion raised in the same quarter last year.

Commenting on the findings, Raj Prabhu, chief executive officer,

Mercom Capital Group, said, "Funding levels were up slightly year-over-year in Q1 2019, but the solar industry was on a much stronger footing at the beginning of this year compared to a year earlier, when the industry was hit with tariffs, subsidy and instal-
