

BEL CMD wins Distinguished Engineer Award

Gowtama M.V., chairman and managing director, Bharat Electronics Ltd (BEL), has received Distinguished Engineer Award instituted by Engineering Council of India. Gowtama received the award from Anil Baijal, retired IAS officer and 21st Lieutenant Governor of Delhi, at a ceremony held in New Delhi.

DMRC to run Metro trains on solar

Delhi Metro Rail Corp. (DMRC), centre-state public sector company, will now run Metro trains powered by solar energy, as it received 27MW power from Rewa Solar Power Project, based in Madhya Pradesh. This will be the first time DMRC will get power from an outside source.

Seven Taiwanese firms eye Gujarat to set up units

After announcing big ticket investments in Gujarat's chemical and automobile sector during Vibrant Gujarat Global Summit (VGGS) 2019, companies from Taiwan are now eyeing the state to set up plants. State government sources privy to the development indicated that some seven companies from Taiwan are mulling over investing in the auto component manufacturing sector. These companies include Seyi Group, Roller King Enterprise and Kao Ming Machinery Ltd, among others.

MediaTek focuses on R&D in India

Taiwanese chipset maker MediaTek is focusing on strengthening its research and development (R&D) division in India and is keen on ramping up its headcount in

the country by increasing its R&D team to more than 800 people. The company, whose products are used across phones, television sets, set-top boxes and other devices, has around 650 people in its R&D team in the country across Bengaluru, Noida and Mumbai.

CII launches online self-assessment tool for Indian industries going digital

Confederation of Indian Industry (CII) has launched CII-Tata Communications Centre for Digital Transformation's "Digital Maturity Appraisal" at CII Annual Session 2019. The digital transformation self-assessment tool will help Indian industries navigate today's business landscape as it continues to undergo rapid changes, led by digital technologies that are transforming the way systems, processes and people work.

Electronics For You Prize awarded on 60th Institute Day of IIT-Madras

This year, the prestigious Electronics For You Prize was awarded at the 60th Institute Day of Indian Institute of Technology, Madras on April 22, 2019, at Student Activities Centre [SAC], IIT Madras campus. The award was introduced by Ramesh Chopra, founder and chairman of Electronics For You Group in 2012 to encourage students to innovate and create as engineers all that will help the nation at large. In fact, the inception of *Electronics For You* magazine came while Chopra was a student at IIT-Madras.

Wistron, which last year announced plans to invest ₹ 30 billion in Narasupra industrial sector in Karnataka's Kolar district, started Apple operations with assembling low-end iPhone SE and later iPhone 6S. According to Wistron India head, Gururaj A, the company would set up an iPhone making unit in the 43 acres of land allotted to it, with employment potential of over 10,000 people. The new Wistron facility is also set to manufacture a wider range of Apple's devices.

Apple is slowly but steadily strategising its plans to make deeper inroads in a country where more than 450 million people use smartphones, and assembling iPhone 7 is another step towards gaining more ground.

Panasonic targets ten billion rupees revenue from smart factory solutions

Panasonic has announced that it is planning to ramp up its smart factory solutions business in India. The company is targeting to achieve ten billion rupees in revenue from this business in the coming three years. It is expecting that solutions and digital manufacturing will contribute 15 per cent to the overall smart factory business revenue.

The company plans to open a technical centre in India for its smart factory solutions that will serve as a strategic base that confirms smart factories with customers. The centre could also be used for training purposes where customers could learn the skills needed for operating a digital factory.

"Panasonic is aimed at building India as its innovation hub for the world and developing a strong ecosystem of component and automated manufacturing in the country," the company said in a statement.

The company has integrated its surface mount technology (SMT) equipment business and welding business to consolidate its hardware and software capabilities, and become an end-to-end integrated smart manufacturing solutions provider.
