EFY BUREAU

Flypal

Visit: www.bytzsoft.com
Full version: Paid; free trial

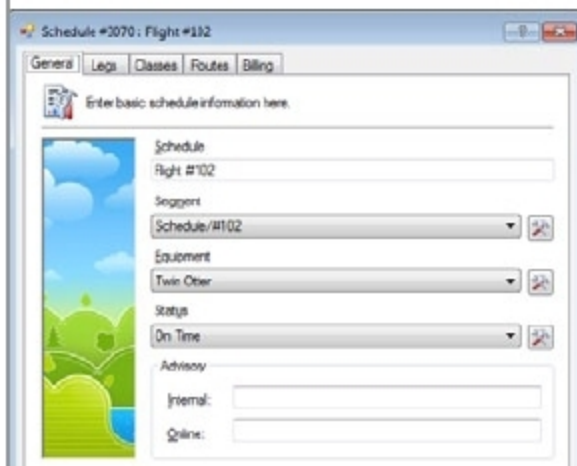

Flypal by BytzSoft provides a variety of services to aviation organisations and operators. It eases daily aviation activities, ranging from data tracking to spares management. Setup is quick, and interface is user-friendly. Major features of the management system include engineering and planning control, equipment and tools calibration, inventory and logistics control, and aviation quality assurance. The reporting and email alert system allows forecast due report to be viewed, downloaded and shared or requested over email without the need for logging into the system. FlyPal SMS software module for safety has options for event management, hazard reporting, corrective action, etc.

Blue Sky Booking

Visit: <http://blueskybooking.com>
Full version: Paid

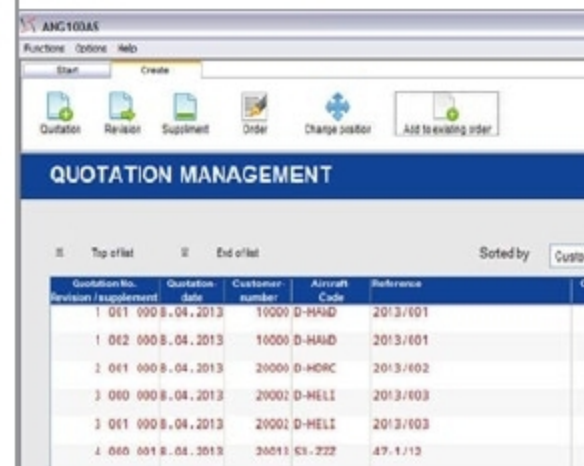

Blue Sky Booking is an airline reservation management platform to assist aviation businesses in routing, bookings and other such services. It enables hassle-free check-ins with such features as automated weight calculations and flight updates for travellers. Customisable reports are available to keep a check on important performance parameters. Its crew portal allows pilots to get printable manifests or view them remotely. It provides customers with the ease to change flights, view past and future bookings, add flights to their calendar, etc. Payment Card Industry (PCI) compliance ensures that payments and other transactions are secure.

LTB400

Visit: www.ltb400.com
Full version: Paid

LTB400 is a maintenance management system for small- and medium-sized aviation companies. Main features include generating orders, creating invoices, components tracking, flight time tracking, inventory control, logistics management, work order management, etc. Data of modules is managed and stored in a single database. Supplier database as well as up-to-date supplier price lists are also available in basic modules. Used test equipment and other tools are documented on a working card, and usage history is maintained based on work orders and employees. Besides cloud support, it can be installed on Windows platform, too.

Cargo Management system

Visit: www.skyres.ca/index.php; **Full version:** Paid

Cargo Management System is a tool by Skyline Aviation for management of such freight operations as shipping, load management, shipments tracking and automated bookings. Its cargo portal provides self-service tools to clients. Cargo email and two-way text notifications ensure easy shipping and receiving. Safety features like automated ECATS (Emergency Call Tracking System) reporting feature, dangerous goods tracking and certified credit card payment processing system are also available. Other features include dimensional weight calculator, advanced service-level agreement (SLA) reporting, remote barcode scanning, warehouse management, transfer point management, etc.
