controls. Dolby Audio along with state-of-the-art box speakers provide a truly immersive audio experience.

Pocket camera

World's smallest and lightest full-frame camera

Sigma Corp. has launched SIGMA fp—the world's smallest, lightest, scalable, seamless, mirrorless digital camera with a full-frame image sensor—in India. The camera is designed to change its configuration with great flexibility centred around the user. With a weight of 370 grams and overall dimensions of 12.6mm × 69.9mm × 45.3mm, the camera is highly portable, and can be comfortably used with drones and gimbals, for portraits, 4K streaming, in the field and more.

The back-illuminated 35mm full-frame Bayer sensor with 24.6 effective megapixels supports full-fledged video production with twelve-bit CinemaDNG external recording and 4K UHD/24fps recording.

Smartphone

Unleash the next generation of mobile performance

OnePlus has unveiled OnePlus 7T. With a responsive 90Hz refresh rate and HDR10+ technology, OnePlus 7T's fluid display is smooth, vivid and incredibly immersive. Every experience feels more seamless in 90Hz. Games are more captivating, videos are more cinematic and everyday tasks are easier in a spacious 20:9 aspect ratio. The phone is certified by TÜV Rheinland for superior blue light reduction and viewing safety.

OnePlus 7T's three independent cameras work in concert for versatility, clarity and accurate colour reproduction. Qualcomm Snapdragon 855 Plus powers through intensive 3D games, videos and everyday multitasking with upgraded processor speeds and graphical rendering. Warp Charge 30T charges the phone from zero to roughly seventy per cent charge in just thirty minutes. Up to 256GB of lightning-fast UFS 3.0 storage and 8GB optimised memory make everything faster and smoother on OnePlus 7T.
