

STM32H7 Dual Core

High Performance with Rich Feature Integration

- Dual core architecture
 - Arm Cortex-M7 running at 480 MHz and Arm Cortex-M4 at 240 MHz
 - Delivering up to 1327 DMIPS and 3224 CoreMark
 - Ability to separate user interface from real-time control or communication
- Independent power domains to maximize power efficiency
- Flexible use of two cores, allowing easy upgrade for existing application
- Built-in security: Secure Firmware Install, Secure Boot and Firmware Update
- Graphic and audio support to enable outstanding HMI experiences
- Additional peripherals: MIPI-DSI, 16-bit ADC, FD-CAN, high-resolution timer

Two powerful cores supported by a robust architecture

Display nice graphic
The Chrom-ART Accelerator and MJPEG codec offload the CPU by more than 90%

Transfer data efficiently across peripherals
The main DMA takes care of the intensive data transfers between memories with up to 16 channels to offload the CPU

Manage security
Uses a dedicated hardware accelerator for cryptography and hashing functions to offload the CPU by more than 90%

Generate complex wave forms
High-Resolution timer (2.1ns) can generate complex waveforms synchronized on multiples events, without CPU assistance

STM32H7 ONLINE TRAINING

ACCESSORIES FOR STM32H747 DISCOVERY KIT

B-LCD40-DSI1*

4" WVGA TFT LCD with MIPI DSI/DSI-M interface and capacitive touch screen Note: * for STM32H747I-DISC1 only

B-LCD40-HDMI1

DSI to HDMI adapter

B-LCD40-RP11

15-pin single row flexible printed circuit DSI adapter board

STMicroelectronics Pvt Ltd

Plot No 1, Knowledge Park III,
Greater Noida 201308, Uttar Pradesh, India
