

EFY DELIGHTED ME

EFY has delighted me! I received EFY issue by registered post in response to my complaint on non-receipt of September issue. Thanks a lot!

SUBSCRIPTION RENEWAL

Thank you for reminding me about my subscription renewal! I really like EFY magazine and wanted to re-subscribe to it. Though I am leaving for the UK for my higher education and it may take time for me to settle down, I still renewed my subscription at my UK address. I request you to inform me regarding any discounts, webinars and other related services. Kudos to EFY team!

SHARING MY WORK

I am a subscriber and EFY is really helpful for students as well as research scholars. I also wish to share my work with EFY under DIY section.

Janani R

Assistant Professor,
Department of Electronics and
Instrumentation Engineering,
SCSVMV University, Kanchipuram

EFY. Thanks for the feedback! Please send your article/project to editsec@efy.in for review.

SMART WORLD SECTION

The "Smart Power Solutions For Smart Cities" under Smart World section in September issue is an excellent article! Power generated by solar and wind turbine energy is useful for India.

The "Battery Management System in Electric Vehicles" article published in the same section is also interesting.

Power for charging the battery from solar is appreciable.

SENSORS IN THE IoT

The "Importance of Sensors In the Internet of Things" article published in February 2018, also available on your website <https://electronicsforu.com>, is an interesting one! Thanks for publishing this article!

Tarun M

□ The "Importance of Sensors In the Internet of Things" article is very informative. Thank you!

SMART SECURITY SYSTEM

I need projects based on Arduino and smart security systems with automatic phone call system. Please send me the list of related topics already published in EFY.

Ameya Bansod

EFY. You may please refer to the following projects on our website:

1. "Smart Home Security System With Automatic Phone Calling System

From <https://electronicsforu.com>

Electronics Projects

In "Design Your Own Li-Fi Dongle and Speaker" DIY article available on your website <https://electronicsforu.com>, what is the data transfer rate and modulation technique used?

Midhun Chakkaravarthi

The author Dr.J. Manikandan replies:

Thanks for showing interest in this project! We tested the circuit by playing songs that are mostly MP3 audio files. These audio files were played on a cellphone and desktop PC by connecting Li-Fi transmitter module to audio output jack. Please note that bit rate of MP3 files is recommended to be 160kbps for best sound quality. You may refer to the following link for additional information on MP3 bit rate: <https://computer.howstuffworks.com/mp32.htm>

Using Arduino With The IoT" on <https://electronicsforu.com/electronics-projects/smart-home-security-system>

2. "Arduino Based GSM Home Security System" on <https://electronicsforu.com/?s=gsm+home>

BIKE TURN INDICATOR

I am interested in "Automatic Bike Turning Signal System" DIY project published in July 2018 issue. I wish to simulate the circuit design on Proteus. Can I find the required libraries for ADXL335 accelerometer sensor in Proteus?

Parva Chandarana

EFY. Thanks for the feedback! We do not have Proteus simulation software. But it seems ADXL335 library is not in Proteus. For more details, you may refer to the forum at: <https://electronics.stackexchange.com/questions/199386/simulating-accelerometer-in-proteus>
