

**First microcontroller with both Arm® PSA
Certified™ Level 1 and PSA Functional API Certified**
**Suitable for IoT security, Smart Meters, Fingerprint Card Readers,
and Connectivity Modules**

The NuMicro® M2351 microcontroller series is powered by Arm® Cortex®-M23 core with TrustZone® for Armv8-M architecture, which elevates the traditional firmware security to the new level of robust software security.

Major features of NuMicro® M2351 Series

- Arm® Cortex®-M23 with TrustZone® processor capable of supporting:
 - 64 MHz operating frequency
 - 512 KB Flash/ 96 KB SRAM
 - Secure Bootloader
 - Secure Debug
 - Cryptographic Hardware Accelerators covering AES, SHA, DES/3DES, and ECC
 - Tamper detection pins
- Low-power consumption with LDO or DC-DC power supply
- Main IoT Platforms connection supported: Arm Pelion and AWS IoT
