Android TVs Certified by Google

SANYO has unveiled Kaizen series, its new range of Android TVs certified by Google that comes with advanced Japanese technology. Equipped with Android Pie 9.0, the series extends a superior TV viewing experience along with Google's user-friendly and dynamic interface.

The Android TVs are designed to give a premium cinematic TV viewing experience. With a host of must-have features, the new range stands out with its IPS super-bright LED display and bezel-less design with flame retardant VO material. The two models—81.3cm (32-inch) and 109.2cm (43-inch)—come with inbuilt Chromecast for content casting so viewers can seamlessly mirror their favourite movies, shows and photos directly from a mobile device. With voice-search capabilities,

they can ask their TV(s) for the latest blockbuster, check the score or even dim the lights.

Bluetooth speaker Delivers premium sound quality on-the-go

Digitek has expanded its Bluetooth speakers series with super bass Bluetooth speaker DBS 007. The gadget is

designed to offer stereo sound quality and comes with IPX6 water-resistant rated housing. It is lightweight and compact, which makes it easy-to-use and easy-to-carry anywhere, anytime.

Other notable features of the speaker are built-in MP3 digital decoder for playing MP3, WMA and WAV files. It also has aux input, external TF card input, and USB socket to enjoy and feel the music. It can play FM music and has inbuilt microphone for hands-free calling.

The speaker sports 1200mAh rechargeable battery, which lasts for more than seven hours when charged for two to three hours. DBS 007 delivers excellent performance and enhances user experience.

Chromebook

Immersive experience with touchscreen, narrow bezel and 180-degree hinge

HP Inc. has expanded its Chromebook portfolio with new HP Chromebook 14 series for Gen Z and modern consumers in India. Powered by Intel Apollo Lake dual-core processors, this new HP Chromebook is equipped with a 35.6cm (14-inch) HD ultra-bright touchscreen display, supports local language and syncs with Android smartphones seamlessly. It is best suited for the tech-savvy, on-the-go Gen Z who prefer to use the Google ecosystem for their various computing needs.

HP Chromebook 14 enables Chrome OS experience for users and supports more than one million Android apps in a functional form factor with 180-degree hinge, designed for both work and play. With less than ten seconds of boot time, users can directly access their files and data by just logging into the system with their Google account. With 64GB of SSD storage and a massive 100GB of Google Cloud storage, users will always have ample memory space on their PC for all their files, data and applications.

Chromebook 14 comes with multiple security features such as Verified Boot, which performs self-checks to repair any system corruptions, Always Ready Security feature with built-in virus protection, auto-updates and sandboxing that runs Web pages and apps in isolated environment to prevent virus infection.
