

Siemens Healthineers invests ₹ 200 million in medical imaging unit in Bengaluru

Siemens Healthineers has inaugurated a new medical imaging manufacturing facility in Bengaluru that is strategically co-located with the company's R&D centre to deliver value to customers faster. Operations will start immediately in this new ISO13485(2016)-certified unit with around seventy employees, with the workforce to be extended in three phases by fiscal year 2025.

Tata Motors, Tata Power to set up 300 EV charging stations in five cities

Tata Motors has partnered with Tata Power to set up 300 electric vehicle (EV) charging stations at key locations in Mumbai, New Delhi, Pune, Bengaluru and Hyderabad. The aim is to improve the inadequate public charging infrastructure for EVs. The stations will be commercially-available to users of EVs of all makes, but Tata Motors EV users will pay a lower tariff, the companies said in a joint statement.

MeitY considers relaxing norms on content monitoring for social media firms

Ministry of Electronics and Information Technology (MeitY) has said it is considering dropping a contentious clause from the draft intermediary guidelines that requires companies to develop automated tools to actively monitor content on Twitter, WhatsApp, Facebook and other social media platforms. Instead, the final rules could ask the platforms to develop mechanisms using artificial intelligence (AI) to find out accounts transmitting illegal, inflammatory or any content that could disturb law and order, or threaten national security, and then take them down.

Ministry of Electronics and Information Technology (MeitY), said, "This initiative will motivate college students across India to innovate and produce some good technology solutions for the major social challenges of India."

Hyderabad's flashy LED lights may be causing harm to humans and animals

Flashy and high-intensity outdoor lights have earned Hyderabad the dubious distinction of being the brightest city in the country, according to a research paper published in International Journal of Advanced Research. The result? Sleep disorders, and other health risks such as obesity, depression and diabetes in humans, with other effects on nocturnal animals, too.

"Excess artificial light or light pollution involves over-illumination, glare, light clutter, sky glow and light trespass that harm living creatures," a researcher said, while speaking exclusively to the *Times of India*. The researcher added that the ratio of

natural radiance to artificial light has increased substantially in Hyderabad.

While light pollution does not raise the same level of alarm that air or water pollution does, the paper warned that Hyderabad's over-illumination is posing a health risk for its citizens. Excessive lighting in outdoor areas could cause a lot of glare

Hero Electronix forays into consumer space with Qubo

Hero Electronix has revealed it plans to invest 1.5 to 2 billion rupees over the next few years, primarily in its new consumer tech brand Qubo, which will offer a portfolio of artificial intelligence (AI)-powered connected smart devices. The company, which is part of Hero Group, has launched a voice-controlled smart indoor camera and smart sensors (for doors, gas leakage and smoke) under Qubo brand.

Qutub Minar now highlighted by architectural lights to draw crowds after sunset

New Delhi's historic minaret, Qutub Minar, built in the 12th century, is set to pull crowds even after sunset as authorities have completed installing architectural lights that will beautify the structure at night as well. The top-notch energy-efficient LED lights will illuminate the five main sultanate structures on the campus, namely, Qutub Minar, Alai Darwaza, Alai Minar, Quwwatul Islam mosque and a gateway. According to concerned officials, the new LED lights will lessen energy requirements by 62 per cent.

Microsoft to train 5000 government personnel on AI cloud

In line with the government's Digital India vision, Microsoft India has launched Digital Governance Tech Tour, a national programme to deliver critical artificial intelligence (AI) and intelligent cloud computing skills to government officials in charge of IT across the country. The initiative comprises a series of physical and virtual workshops, and aims to train 5000 personnel. It reaffirms Microsoft's commitment to empower government organisations to leverage AI and secure cloud technology for efficient, transparent and productive governance.

and impact visibility for drivers and pedestrians. "Although LEDs are being promoted as an environment-friendly option, these are harmful for humans. Long-term and excessive usage of LED lights can result in people finding it difficult to appreciate colours," said Dr Jyotsna Myneni, ophthalmologist at KIMS Hospital.
