

Made In India Mobiles To Reign

Intense competition among cellphone manufacturers is driving down the price of cellphones, which is helping in increased penetration across India. Smartphones are expected to outrun feature phones in the country

The Indian mobile handset manufacturing market, including smartphones and feature phones, is ever increasing. According to India Brand Equity Foundation (IBEF) knowledge centre, India is the second largest cellphone manufacturing hub after China. With the current pace, it is expected to overtake China in the next few years as India's mobile handset market will grow nearly five times faster than the world's

largest smartphone market, China, where growth has decelerated.

According to International Data Corporation's (IDC) Asia/Pacific Quarterly Mobile Phone Tracker, India's smartphone market saw the highest ever second quarter shipment of 36.9 million in 2019, with 9.9 per cent year-on-year (YoY) and 14.8 per cent quarter-on-quarter (QoQ) growth. A total of 69.3 million cellphones were shipped to India in the second quarter of
