

Real-time clock

MAX31341B nanoPower real-time clock (RTC) from Maxim Integrated Products enables designers of space-constrained systems such as wearables, medical monitors, point-of-sale (POS) equipment and portable terminals to extend battery life as well as save power and space. More than 35 per cent smaller than the tiniest RTC alternatives available today, this nanoPower RTC, which operates at less than 180nA, offloads the central microcontroller (MCU) from timekeeping, allowing for greater energy savings during sleep cycles and extension of battery runtime.

Ink paper display module

Electronic paper, or e-paper, display mimics the appearance of ordinary ink on paper. It has reusable storage and a display medium that looks like paper but can be repeatedly written on (refreshed) by electronic means thousands or mil-

lions of times. It is used in applications like e-books, e-newspapers, portable signs and rollable displays, among others. Information to be displayed is downloaded through a connection to a computer or cellphone, or created with mechanical tools such as e-pencil.

Power module

Rajguru Electronics has introduced a 10W ultra-compact, miniature series power supply module, by Hi-Link. It is a small-volume, high-efficiency power module designed for customers. It has the advantages of global input voltage range, low temperature rise, low power consumption, high efficiency, high reliability, high secu-

rity isolation and so on, and can be used in smart homes, automation control, communication equipment, instruments and other industries.

Desktop reflow oven

NeoDen presents a low-power desktop reflow oven having the following features:

- Complete hot air heating system (no PCB burning)
- Nickel aluminium alloy-based heating coil
- Working power < 0.7kW
- Inbuilt smoke filtering system
- Temperature up to 300°C (RoHS)
- Single-phase power supply
- CE approved

THE BEST CONNECTOR SYSTEMS FOR HOME APPLIANCES, AUTOMOTIVES AND HVAC

Applications

Stoves
Lighting Systems
Air Conditioners
Refrigerators
Washing Machine
HVAC Industry

STOCKO CONTACT GmbH is a World Leading Manufacturer of crimp terminals, Insulation Displacement Connectors and Lighting systems in Automotive, White Goods and HVAC Industries. Stocko has an IN HOUSE Machine Design and Development Centre where Hand Operated to Fully Automatic Machines are built. This increases Efficiency and Reliability on Stocko Parts Worldwide. In India, several OEM's and Harness Makers use Stocko parts for their versatile applications ranging from Automotive to HVAC to Home Appliances markets.

- Wide range of Crimp Terminals, Tabs and Pins
- Multiple IDC Connector Systems from 2.5mm to 5MM
- IDC - Connectors, Machines and Tools • German Design, Precision and Quality
- Over 7.5 Million Connectors Sold in 2017-18
