Zoi Meet

Visit: www.zoimeet.com
Full version: Paid; free trial

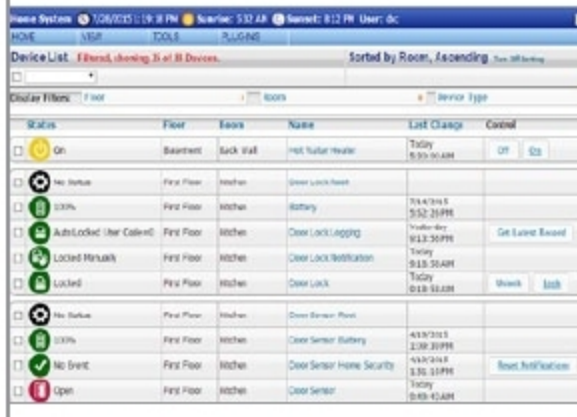

Zoi Meet is an artificial intelligence (AI)-based multilingual real-time subtitling and transcription software. It enables smart team collaborations by instantly analysing content to transcribe meetings and other important conversations. Audio files are either imported or recorded live through the automated note-taking process. It has dedicated micro-engines trained to support industry jargon. All data is encrypted and stored on secured servers. The software can be detached from the cloud and installed on the user's server, if necessary. One can also get sentiment analysis, valuable information in keyword cloud and overall transcript data for better understanding.

HomeSeer3

Visit: <https://homeseer.com>
Full version: Paid; free trial

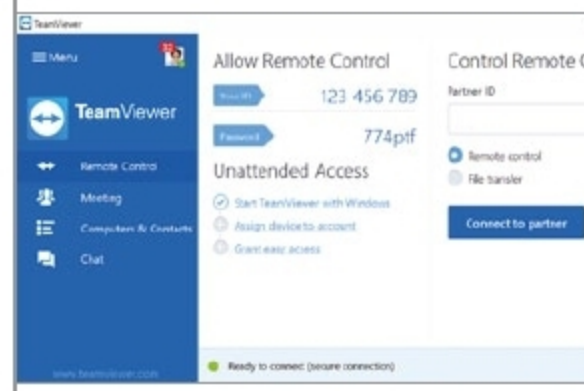

HomeSeer3 is a smart home automation software that can work with several devices such as lighting, thermostats, security systems, audio-video equipment, environmental sensors, IP cameras, etc. Devices in the house can be easily controlled even when there is no Internet connection. Locally-processed automation guarantees that there are no delays. The software ensures security as important data is never saved in the cloud. Emails and text alerts can be fully-customised. The software supports several products, and is compatible with IFTTT, Amazon Alexa and Google Home Assistant devices.

TeamViewer

Visit: www.teamviewer.com
Full version: Paid

TeamViewer helps the user to remotely connect to PCs, mobiles, the Internet of Things (IoT) devices for real-time support, or access files, networks and programs. It allows connections across multiple platforms, making it simple for people receiving support. Files of any size can be transferred from the computer or cloud storage. Documents can be printed locally from the remote computer that is being accessed in Windows devices. Unlike most other software that use virtual private network (VPN), TeamViewer provides security through features like 256-bit AES Encryption and two-factor authentication. Other features include chatting with individuals or groups, video calls for collaboration, installing applications, etc.

TrakaWEB

Visit: www.traka.com
Full version: Paid

TrakaWEB is an administration software to centrally manage Traka Touch key and locker systems on devices like smartphones and PCs. It is easy to set up and has a user-friendly interface. A complete history of all key, asset, locker and user transactions is maintained so that evaluation can be done whenever needed. Item Booking feature allows the user to reserve items for a specific amount of time. The management gets notified if a user reports an issue or fault against items. It also provides instant email notifications to alert the user(s) of specific key or asset movements, events and overdue curfews.
