

SpeedFan

Visit: www.almico.com

Full version: Free

SpeedFan is a free software that monitors voltage, fan speed and temperature in PCs. Voltage readings help in identifying any issues in the system. As present-day CPUs can report their temperature, the program accesses those readings and reports the changes. Based on temperature, fan speed gets changed as per requirement to decrease noise. It can handle a large amount of data, and custom events can be created to tackle situations automatically. In-depth Online Analysis feature aids in early detection of hard-disk failure.

Refrigerant Slider

Updated: February 2019

OS: Android and iOS

Download: Full version (free)

Refrigerant Slider is a user-friendly app specially designed for heating ventilation air conditioning and refrigeration (HVACR) professionals to provide an instant pressure-to-temperature refrigerant converter. It covers more than eighty different refrigerants. Data like global warming potential (GWP) and ozone depleting potential (ODP) is also available. On typing the precise pressure or temperature reading, the app provides the corresponding figure and the slider moves for visual indication. Measurement units—SI (International System of Units) or Imperial—can be selected as per convenience.

Xbox

Updated: July 2019

OS: Android and iOS

Download: Full version (paid)

Xbox app allows users to control their Xbox One by acting as a media controller (play, pause, etc) or navigator. Interaction with other gamers is possible using Live Clubs feature. Updates and game clips can be posted to the activity feed. To search for a party to play the game, Looking for Group (LFG) option can be used. Other options include buying new games from the store, watching and interacting with game content, and multi-user conversations in group messaging. The app is offered in several languages including English, French, German, Japanese, Russian, Spanish and Turkish.

Cashify

Updated: July 2019

OS: Android and iOS

Download: Full version (free)

Cashify is a platform for selling old gadgets such as cellphones, laptops, tablets and gaming consoles. The device to be sold gets diagnosed automatically, and the user is provided with a price quote for the same. After Sell Now option is chosen, the device gets picked up and the user receives the payment. Payment options that can be chosen are cash, bank transfer, wallet transfer and vouchers. The app does not require the user to post advertisements and ensures complete security by removing data after the device is sold.

WeMo

Updated: June 2019

OS: Android and iOS

Download: Full version (free)

Wemo for smart home automation allows users to control lights, appliances and more from anywhere in the world. Devices can be scheduled to be switched on or off for a particular time of the day or vary according to the sun. Away Mode enables switching lights on or off randomly so that it looks like there is someone inside the home even when it is empty. The app can work with Nest and IFTTT. The latest update includes support for WeMo Light switch, improved security for Wi-Fi setup and better widget to control devices from the home screen.

Sony Headphones Connect

Updated: July 2019

OS: Android and iOS

Download: Full version (free)

Sony Headphones Connect app enables customisation of features like surround effect and equaliser function in such headphone models as WF-1000X and WI-H700. It has easy controls and a connection guide for first-time users. Settings can be viewed and configured through the dashboard. Noise cancellation and ambient sound mode settings can be changed by using Ambient Sound Control feature. To change ambient mode setting automatically through activity recognition, Adaptive Sound Control feature is available. Direct access to help menu is provided for both headphones and the app. The user can choose to be notified of updates and other important information.
