

10kW BI-DIRECTIONAL CHARGER

Designed for Battery Manufacturing

- State-of-the-Art SiC Technology
- Programmable constant output power
- Efficiency is up to 96% at Vout adjust from 20V@500A to 200V@50A
- No minimum load
- No Load power consumption as low as 123W
- Charging Mode: AC → DC
- Discharging Mode: DC → AC (In discharge mode, energy back to AC supply at 91% efficiency)
- Robust 19" Rack format
- CAN-bus controlled bi-directional DC/DC module for current sharing
