Apple iPad Pro

Featuring redesigned Retina display

The much-awaited 26.7cm (10.5-inch) Apple iPad Pro is now available in India. The model ships with iOS 10 and comes with the new Files app, customisable dock, improved multitasking, and deeper integration of Apple Pencil. Featuring ProMotion technology, it can refresh at rates of up to 120Hz for fluid scrolling, greater responsiveness and smoother motion content. The Retina display is claimed to be the brightest iPad display yet.

iPad Pro is powered by the new 64-bit A10X Fusion chip with six-core CPU alongside 12-core GPU under the hood. It also sports iPhone 7-like camera system—a 12-megapixel rear camera with optical image stabiliser and a 7-megapixel FaceTime HD camera. The four-speaker audio system can offer clear and rich stereo sound. Connectivity options include Wi-Fi 802.11ac and LTE Advanced. The new model also features Apple's Touch ID and enables payments through Apple Pay.

Smart Touch-Screen Mirror

Updates you with feeds from Facebook and Twitter, and news from leading publications

Nuovo has introduced a touch-screen 'Smart Mirror' that reflects more than just a face. It can keep you updated with notifications from social sites like Facebook and Twitter. You can get the latest news from leading publications, access YouTube videos, and even book cab through Uber. In addition to this, this smart mirror will always keep you on top of your daily schedule with the help of Google Calendar, and access e-mails. You can control the app to be displayed on the mirror for easy access through the mirror as well as mobile application.

You need to install it in the place of choice with a dedicated UPS connected, a Wi-Fi connection and Smart Mirror app downloaded. Once the app is downloaded, register yourself by signing up and syncing all the apps by allowing them to access the information.

Samsung Galaxy On Max Smartphone

Tailor-made for low-light photography

With Samsung Galaxy On Max smartphone, click brilliant photographs under all light conditions and share them on-the-go with a single click. The phone includes powerful 13MP front and rear cameras, with f/1.7 aperture on the rear camera.

Available exclusively on Flipkart, the smartphone enhances the overall experience of clicking and sharing images with live filters and cool Indian-themed stickers. The phone also features Samsung Pay Mini—a simple, secure and almost everywhere payment system.

Galaxy On Max is powered by a 2.39GHz, 1.69GHz octa-core processor, a 3300mAh battery and 4GB of RAM. The 32GB internal memory and a micro-SD slot expandable up to 256GB provide huge storage space. The phone has a 14.5cm (5.7-inch) full HD display, and comes in black and gold colours.

122cm Full HD Smart TV

With inbuilt 10W + 10W box speakers

Daiwa's newest 122cm (48-inch) smart LED TV, L50FVC5N, packs a dual-core processor, and 1GB RAM and 8GB internal memory, so it is powerful enough to run multiple applications. The TV works with a smart web cruiser remote, which also has an inbuilt mouse. The remote allows comfortable typing with Qwerty keypad and mouse control.

In sync with the faster performance, the TV comes with a unique feature that kills the apps running in the background when not in use. Closing down these apps not only frees the RAM but also optimises the TV's performance.

The Android-based operating system allows streaming of any channel at any time. Project any digital content from your gadget's drive right onto your television with the screen mirroring facility or M.Cast.
