FIRST LOOK

Full Frame Camera

Give your photography
a 'sense of genius'

Canon's EOS 6D Mark II DSLR camera is set to empower stunning and versatile expressions of photography. Featuring a 26.2MP full-frame CMOS sensor, the camera delivers exceptionally clear images even under low light conditions. It is equipped with dual-pixel CMOS AF technology for high-performance focus tracking in Live View mode as well as DIGIC 7 image processor for high image quality even in dimly-lit situations. Versatile vari-angle touch panel gives users the flexibility of shooting from a high or low angle.

The EOS 6D Mark II supports a continuous shooting speed of up to 6.5fps, which promises sharp image capture of even fast-moving subjects. In Live View mode, continuous shooting speed is up to an impressive 4fps. With Wi-Fi and NFC connectivity, users can transfer images and videos from the camera to the smart devices and upload them onto the Canon Image Gateway, social media platforms and cloud storage.

Portable One-box Audio System

Party anywhere with Sony
MHC-V50D

Sony India has added a new product to its one-box audio line-up, MHC V50D. Catering to all party lovers, the system features plug-in guitar and karaoke mode, illuminated LED touch panel, intuitive operation with motion control, high-quality audio via NFC and Bluetooth technology, DJ function with music centre and party lighting. The speaker is embedded with an option for

built-in DVD/CD player, USB port, audio input and HDMI output and also comes with a built-in FM radio tuner. As a powerful wireless audio device, MHC-V50D produces impressive 660W audio output.

Wireless Presenter

Just point, press and impress

iBall Presento 60 multi-functional presenter device comes in a slim design with six buttons and an in-built laser pointer. The design is extremely comfortable to hold and has a clip for your comfort to carry along.

Be in control from the first slide to last with intuitive slideshow controls, as the buttons assist you in taking your presentations forward and backward. Volume buttons on sides act as volume controller. You can also blank the screen to focus audience attention on your most important points during the presentation. The remote allows access to Hyperlinks on a single point. Intuitive controls and red laser point make presentations a snap, even in the darkest auditorium.

With a simple plug-and-play USB interface, the device is no less than a remote control for the users. It also houses a cordless receiver for easy portability.

Gionee A1 gets a new update

Gionee has rolled-out a new over-the-air (OTA) update for its A1 device that allows users to capture moments of togetherness with panoramic pictures and HD selfie videos without having to squeeze to fit into the frame. Additionally, the update also offers visual guidance to the users.

App to create digital billboard messaging

Developed by Patrick Mimran, who turned around Lamborghini in the '80s, the new Apos app is a free messaging system that allows users anywhere in the world to create their own billboard with quotes, aphorisms and comments about art, politics, news, fashion, music or any subject related to their daily lives and interests. They can publish billboards on the app for Apos followers, send billboards to friends via email, and share them using Instagram, Facebook, Twitter, WhatsApp, Pinterest or other social media sites.

Aadhaar integration now available on Skype Lite

With the latest version of Skype Lite, Aadhaar (India's national ID) integration can be used to verify users' identity online, helping them communicate more securely with others. Either party can request Aadhaar verification over a video call using Skype Lite. In order to confirm your identity, you'll need to click on 'Verify Aadhaar identity,' enter your 12-digit Aadhaar number and then authenticate with a one-time password sent via SMS. Once validated, you can choose to share pre-selected Aadhaar information with the other person to confirm your identity.

Google introduces news feed based on your searches

Google is rolling out a personalised stream of articles, videos, and other content. The feed will appear in its flagship app for Android and iOS, simply called Google. The feed includes content drawn from users' search history and topics they choose to follow. Google hopes users will begin opening its app the way they do Facebook or Twitter.
