Calendar of Forthcoming Electronics Fairs/Exhibitions/Seminars/Events

Name, Date and Venue	Topics	Contact address for details
CES 2018 January 9-12, 2018 Las Vegas, Nevada, USA	World's gathering place for those who thrive on the business of consumer technologies and where next-generation innovations are introduced to the marketplace	Consumer Technology Association Website: www.ces.tech
NEPCON Japan January 17-19, 2018 Tokyo Big Sight, Japan	Asia's leading exhibition for electronics design, R&D and manufacturing technology	Reed Exhibitions Japan Ltd Website: http://www.nepconjapan.jp/en/
Electronics West February 6-8, 2018 Anaheim Convention Center, California, USA	North America's largest annual design and manufacturing event	Electronics West Website: http://electronicswest.designnews.com/
Embedded World 2018 February 27-March 1, 2018 Exhibition Centre, Nuremberg, Germany	Trade fair for IT security for electronic systems	NürnbergMesse Website: www.embedded-world.de/en
ELCERAMA March 10-14, 2018 India Expo Mart, Greater Noida, Uttar Pradesh	Flagship showcase of the Indian electrical industry ecosystem and the largest congregation of power sector ecosystem in the geography; brings together the complete spectrum of solutions that powers the planet	IEEMA Website: http://elecrama.com , http://ieema.org

Since this information is subject to change, all those interested are advised to ascertain the details from the organisers before making any commitment.

These six supercomputers will be placed at four IITs (Banaras Hindu University, Kanpur, Kharagpur and Hyderabad), Indian Institute of Science Education and Research, Pune, and Indian Institute of Science, Bengaluru.

The NSM envisages nearly 50 supercomputers in three phases. The government plans to make these high-precision computing machines available for scientific researches across the country.

Reliance Unlimit and China's Fibocom to jointly develop IoT solutions

Reliance Communications' Unlimit has partnered with Chinese telecom gear maker Fibocom to design and manufacture modules for wireless communications and develop Internet of Things (IoT) solutions.

"The number of connected devices in India is projected to rise from 200 million today to three billion by 2020, and nearly every part of the economy will be positively impacted by IoT," said Unlimit chief executive officer Juergen Hase.

"We are delighted to partner with Fibocom to unlock the full potential

of the Internet of Things for our customers," he added.

Unlimit is an independent company of Reliance Group that focuses solely on providing IoT solutions to enterprises.

Foxconn eyes exports from India to Gulf, Africa by Dec

Taiwan-based electronics contract manufacturer Foxconn plans to start exporting to the Middle East and African countries from India by year-end. It has already initiated talks with suppliers to set up base in India—the fastest growing smartphone market in the world.

The electronics maker has stepped up expansion of its manufacturing facility in Sri City, Andhra Pradesh, and is looking to add more locations. If everything goes as planned, Foxconn would be much ahead of Samsung's target of exporting from India by 2020.

Intex to co-develop Reliance Jio 4G phone

Reliance Jio has chosen Intex as a vendor for its 4G feature phone, which will debut in August and help Reliance Jio get users that

couldn't switch to its 4G network as their 2G/3G phones didn't support 4G VoLTE.

"The phone, which Intex is making in India, will be priced by Jio through a subsidy model, and will also be marketed by the new telco, with the handset maker not involved in both aspects," said Nidhi Markanday, director and business head, Intex Technologies.

Canon to expand retail presence

Canon India plans to increase the number of Canon Image Square (retail stores) in India from 232 to 260 by year-end.

"The expansion would not only take place in metros but also in tier II and III cities. Naturally, the size of the stores tend to get smaller in smaller towns than in metros but the function will be the same," said Kazutada Kobayashi, president and CEO, Canon India.

INNOPAT, 2nd Edition concludes successfully in Bengaluru

India Electronics and Semiconductor Association (IESA), the premier trade body representing the Indian electronics system design and manufacturing (ESDM) industry, and IPExcel, a technology research and consulting firm founded by IIT Kharagpur alumni, recently hosted INNOPAT—a social initiative to promote and showcase innovative proprietary (patented) technologies in India.

In its second edition, the focus was on addressing the practical issues in patents experienced by innovators. The day-long conference had interesting sessions such as do-it-yourself patent filing workshop, outlook of investors on patent-driven start-ups, most innovative idea contest, case studies of successful start-ups, IP strategy for growing businesses, and a live consultation desk to evaluate the patentability of ideas.
