

Government facilitating wide-scale implementation

According to a Press Information Bureau (PIB) announcement, by 2019, 770 million LED bulbs and 35 million LED street lights will be deployed to replace conventional lights. Under the Deen Dayal Upadhyaya Gram Jyoti Yojana (DDUGJY), 27.3 million LED bulbs will be distributed to below-poverty-line (BPL) households. Under SLNP, over two million conventional street lights have already been replaced with LED street lights across the country.

TOP FIVE STATES THAT HAVE REPLACED CONVENTIONAL STREET LIGHTS WITH LED LIGHTS

State	Number of street lights	Energy saved annually (kWh)
Rajasthan	704,891	99,054,808
Andhra Pradesh	586,037	82,352,849
Delhi	264,185	37,124,579
Gujarat	200,536	28,180,321
Goa	94,856	13,329,639

(Source: Press Information Bureau)

LED street light installation has resulted in energy savings of 295 million kWh, avoided capacity usage of over 73MW and cut carbon emissions by 230,000 million tonnes annually. The project has been implemented across 23 states and union territories.

residential lighting, office space lighting and industrial lighting.

The demand for street lights is driven by government initiatives, while in residential and office spaces, demand is mainly driven by increasing consumer awareness about energy-efficient products with more functionalities. In industrial areas, LEDs are used in warehouses, manufacturing floors, etc. In hazardous work areas across industries too, most of the new lighting is LED based.

The demand for LED lighting in India still mostly comes from metro cities, mainly because of better consumer awareness and higher socio-economic growth. However, the demand from Tier-II cities is also expected to grow based on requirements from street lighting and industrial lighting domains.

Currently, though, LED lights are not used much in rural India. Energy Efficiency Services Limited (EESL), a public-sector energy services company under the Ministry of Power, government of India, will implement the first rural LED street lighting project by retrofitting one million conventional street lights with LED lights in the *gram panchayats* of seven districts of Andhra Pradesh under the Street Lighting National Project (SLNP). Further expansion of such initiatives across the country will
