Home theatre system from Sony

Fill the room with 5.1 channels of real surround sound

Sony HT-RT3 is a 12.9cm (5.1-inch) surround sound bar system with an external subwoofer that ensures purest movie sound. HT-RT3 comes with a 5-master digital amplifier for refined and clear sound quality. It is powered with a USB audio playback and easy Bluetooth connectivity with NFC one-touch. The system is almost ready to go, straight out of the box. Just plug it in, wire up the speakers via colour-coded connections and enjoy 5.1 channels of real surround sound. All your cables run into the subwoofer, so you can keep things neat and tidy.

Hicare and Blueair introduce air purifiers

Do not let your lungs choke

Hicare, HACCP-certified pest control service provider and home cleaning services company, in partnership with Blueair, has launched a new series of air purifiers. The range comprises three models, namely, iClassic 280i, iClassic 480i and iClassic 680i, with a patented HEPA Silent technology that ensures whisper-silent delivery. These three models can be categorised as smart air purifiers due to their Wi-Fi enabling mode. The air purifiers can also be controlled using Blueair Friend app, which can be installed on your Android/Apple phones.

Price
₹55,000
(for iClassic 280i)

LeEco smart TVs launched in India

With next-generation technology and a design to go with the most lavish of lifestyles

LeEco has launched Super4 series smart TVs in India. The TVs come with HDR10—a dynamic range that creates perfect pictures that are more realistic, with greater contrast between highlights and shadows. Workstation-grade quad-core ARM Cortex CPUs and multi-core ARM Mali GPUs give powerful performance and smooth playback. An 85 per cent wide colour gamut means you see pictures the way these are meant to be seen—just like in real life. MEMC dynamic image processing eliminates blurring, trails and judder with enhanced picture quality, especially while showing sports content. With a variety of apps and utilities, the intuitive EUI of Super4 makes accessing files and using apps a breeze.

₹46,990
(for Super4 X40 model)

Smartphone from LG

With Panic Button SOS feature

LG Electronics has launched K10 2017 smartphone with an emergency panic button that can be pressed to generate an alarm by a vulnerable target in case of an unforeseen situation. LG Electronics is the first company to adhere to Telecom Regulatory Authority of India (TRAI) recommendation to have a single number 112 for all emergency calls in mobile phones across the country, which is referred to as Panic Button implementation.

The 148.7mm x 75.2mm x 7.9mm smartphone has a full-touch screen form factor, 13MP rear camera, 5MP front camera, connectivity options including GPRS, Wi-Fi, Bluetooth and OTG, sensors like finger print, proximity, accelerometer, digital compass, ambient light and hall IC, and many more features.

112 SOS can be activated in the following ways:

Price
₹15,000

1. Pressing of power key (on the back) three times
2. Long press of power key brings up a menu wherein Emergency Call option can be selected to indicate the call
3. In lock screen mode direct option is available to initiate an emergency call
