

**Digital India responsibility assigned to MeitY**

The government's Ministry of Electronics and Information Technology (MeitY) has been assigned the responsibility of implementation and expansion of the government's Digital India initiative. Earlier, implementation of the initiative was handled by a committee spearheaded by Niti Aayog chief executive officer, Amitabh Kant. Hereafter, Prime Minister's Office has entrusted the ministry to administer all matters related to further expansion of the digital payments initiative.

CAIT, MeitY join hands to raise awareness about digital payments

The Confederation of All India Traders (CAIT) and MeitY, government of India, have jointly launched a national campaign to promote the adoption of electronic payments in line with Prime Minister's vision of digital India and a less-cash economy. The campaign will be jointly conducted by CAIT and NIELIT, a body under MeitY. During the campaign, five regional conferences, 30 state-level conferences and 100 *Digidhan* camps will be organised in different parts of the country.

CoreEL Technologies opens new 3D printing experience centre in Bengaluru

CoreEL Technologies India Pvt Ltd, a customer application-specific products and solutions company and a channel partner of Stratasys India, subsidiary of Stratasys—the 3D printing and additive manufacturing solutions company, have announced the opening of their new 3D printing experience centre in Bengaluru. The experience centre has been established to offer professional 3D printing solutions, additive manufacturing application consultations and customer services to support local organisations throughout their design and manufacturing workflows.

Wipro joins LoRa Alliance to accelerate IoT deployments

Wipro has become a member of LoRa Alliance, one of the fastest growing Internet of Things (IoT) alliances with over 400 members. This membership will help Wipro accelerate its IoT solution deployments, using Low Power Wide Area Networks (LPWAN) technology for customers across industry sectors such as energy, utilities, natural resources, smart cities, ports and logistics.

Rohde & Schwarz, MediaTek collaboration to test concepts for 5G

Rohde & Schwarz and MediaTek have announced their collaboration on test concepts for 5G wireless communication technologies. The purpose of this cooperation is to explore partners in driving 5G developments in several areas including mm-Waves for 5G radio access and over-the-air testing concepts for massive MIMO antenna arrays.

NTPC installs India's largest floating solar PV plant

NTPC has started power generation from India's largest floating solar power plant at Kayamkulam in Kerala. The 100kWp floating solar-generation plant, largest of its kind in India, was indigenously developed as a part of Make In India initiative, at Rajiv Gandhi Combined Cycle Power Plant in Kerala's Kayamkulam district. Solar panels mounted on floating boards that hold these in place save land usage and have been found to be more efficient than the ones installed on land.

Samsung, Apple top global semiconductor buyers' list in 2016: Gartner

Representing 18.2 per cent of the total worldwide market, Samsung Electronics and Apple remained the top two semiconductor chip buyers in 2016, according to market research firm, Gartner. The tech giants together consumed US\$ 61.7 billion worth of semiconductors in 2016—an increase of US\$ 0.4 billion from 2015.

NEO Innovations wins GR PEACH Design Contest India

The 'Mini Gateway For Automation And Security' project by NEO Innovations, Hyderabad, has bagged the first prize in GR Peach Design Contest India 2016. The contest was organised by Renesas Electronics in association with EFY Group. MBCE, Trivandrum, and Sri Eshwar College Of Engineering, Coimbatore, have landed the second and third positions, respectively.

tech televisions using quantum dot technology, as it seeks to strengthen its market share in the global premium TV market. Quantum dot TVs offer better picture quality and cheaper manufacturing costs than organic light-emitting diode TVs.

At the global launch event for the premium TVs in Paris, the electronics giant stated that the new products demonstrated Samsung's leadership in defining the future of home entertainment with advanced cutting-edge technology.

As per the statement given by Samsung's representative, the new QLED TVs take quantum dot technology to the next level with advancements in light efficiency, stability and a wider colour spectrum.

Cisco launches first Made In India product

In October 2016, networking giant Cisco had announced the launch of its India manufacturing operations in Pune. The company had stated that it would manufacture and roll out a diverse product portfolio in India to support the government's Make in India initiative and use India manufacturing operations to produce and ship orders for customers in India as well as for testing, development, logistics and in-house repair capabilities.

Cisco has handed over its first Made In India product, a router, to minister for electronics and IT, Ravi Shankar Prasad. The new product is among the most popular in Cisco's core switching portfolio globally. It is fundamental to network connectivity, a key enabler to the vision of Digital India, and can be used by small and medium businesses across multiple industries.
