FIRST LOOK

Home Cinema Projector

Displays 4K UHD images with true 8.3-million pixel detail

BenQ's CineHome W1700 DLP projector brings the magic of big-screen 4K digital cinema to homes. Producing 8.3 million distinct pixels for true 4K UHD performance, W1700 utilises single-DMD DLP technology and pure 4K-optimised optical system for image precision and colour accuracy without artifacts that can plague LCD projectors.

Evoking genuine emotions by preserving authentic cinematic colours, W1700 employs exclusive BenQ CinematicColor technology with RGBRGB colour wheel to meet the film industry's highest standards of colour accuracy. High dynamic range (HDR10) support offers greater brightness and contrast range with auto image optimisation.

Simple and modern, W1700 easily becomes a smart projector by connecting an HDMI dongle such as Google Chromecast or Amazon Fire TV Stick to instantly stream TV shows, movies, sports, and even video games to the big screen.

The projector will be available from January 2018.

Multi-fitness Activity Tracker

Featuring GPS and pre-loaded sports apps

Garmin's vivoactive 3 GPS-enabled smartwatch keeps an individual tab on a variety of activities using the 15 pre-loaded apps package. With vivoactive 3 on their wrist, users can continue to monitor their running, swimming, cardio or strength training performance in real time. The device can also be set to measure the elliptical, yoga, stair stepper, floor climbing, boxing and cardio workout performance.

Vivoactive 3 has a compact screen with a high-resolution, full-colour Garmin Chroma Display. Its inbuilt software converts the raw data into a comprehensible, readable form. Users can measure their heart rate and assess their stress levels based on their physical activity level or other changes in the schedule. To add convenience, there is a

new feature called Garmin Pay, which works like a wallet by initiating purchase payments using the smartwatch. The watch battery works up to eight days without any interruption.

Paytm launches in-app messaging feature similar to WhatsApp

Digital wallet app Paytm is all set to take on Facebook-owned WhatsApp with the launch of its in-app messaging facility. Called Inbox, the feature enables users to chat with friends and family as well as send and request money. Inbox is now live for Android users and will be available for iOS users, too. Paytm is using end-to-end encryption on messages, offering the same set of security protections as WhatsApp. It also offers the ability to share live location, recall messages, and exchange photos and videos. However, unlike WhatsApp, Paytm allows users to initiate a private (incognito) conversation.

YouTube TV app for smart TVs

Google's Live TV streaming service YouTube TV is now becoming available to actual TV viewers with the launch of dedicated apps for smart TVs, streaming devices and gaming consoles. Hitherto, YouTube TV has been available via mobile, desktop and casting. The company is launching a YouTube TV app for Android TV devices, including Nvidia Shield; TVs with Android TV built-in, like Sony; and the Xbox One family of devices, including Xbox One, Xbox One S, and soon Xbox One X. It will also roll out TV apps for other smart TVs, including those from LG, Samsung and Sony, as well as an app for Apple TV.

Take stock on your smartwatch with Moneycontrol's app

Moneycontrol claims to have launched India's first smartwatch application that enables voice search for stocks enabled on the Apple watch. Open Moneycontrol on your watch, tap on the voice button, say the name of your favourite stock and you get all the relevant information right on your watch.
