for the Hyperloop will be handled electronically, thus negating the need for printed boarding passes and luggage labels. Luggage would be stowed in a separate compartment at the rear of the capsule, in a way similar to the overhead bins on passenger aircrafts. This luggage compartment will be removable from the capsule for stowing and retrieving luggage to be undertaken separately from embarking or disembarking the capsule's passenger cabin.

The transit area at the Hyperloop terminal would be large and open with two large airlocks signifying the entry and exit points for the capsules. An arriving capsule would enter the incoming airlock, where
