Smart speakers from Amkette

For a unified acoustic experience

S-50 is a multi-connected device that can also be controlled with smartphones by downloading the app from Google Play store. The app helps control speaker functions such as FM radio, USB/SD card playback and alarm clock. It is loaded with features like aux, USB, microSD, USB DC and on/off button, and gives a playback time of 12 hours.

Developed to give an ultimate home entertainment experience, the 10W reflective bass speakers have an imperial design with a clock display, making the speakers an item of home décor, too. With simple and easy functions to use, the speakers have built-in FM radio and USB charger with 1.5A output for fast charging. With a smart MP3 player, smart radio system and smart alarm clock, it aims to give you a hassle-free experience to enjoy music.
