Car speaker from Pioneer

Designed for the young generation

TS-R6951S's progressive flex suspension system allows it to provide clear sound and impactful bass. A fully-covered mesh grille provides it high reliability and prevents it from dust, which makes it perfect for installation in the rear tray of the car. It is made of multilayer mica matrix cone with a water-resistant coating at the back for loud sound reproduction, efficiently engineered to handle up to 400W power input from a shallow design. The three-way speakers feature three different drivers for effectively recreating separate sound frequency.

Portable headphone amplifier from FiiO

Longer battery life backed by smart charging

FiiO has launched a new audio amplifier, the A5, in India. Weighing about 168 grams, the device has a sandblasted finish. The amplifier can be considered an upgrade from the earlier-launched E12 series, with added features. It continues to use FiiO E12A's MUSES02 and LME49600 op-amp combination. It uses high-precision metal-film resistors to offer a total harmonic distortion rating of almost zero per cent. With an improved signal-to-noise ratio of 115dB, FiiO A5 has a low-resistance power management system with dual $\pm 11V$ supplied power. The device offers an output of almost 800mW at 32 ohms. With a battery backup of 880mAh, the device has a playtime of about 13 hours on a single charge. It is also designed with an LED indicator, making it easy to determine when the device is about to run out of battery or when it is fully charged.

GizMo ByTes

PhotoScan by Google Photos

This new application from Google allows you to scan your paper photos with the camera of your smartphone. Using it is really very simple: launch the application and let it guide you. In a few seconds you can get photos of your childhood on your smartphone to immortalise these on the Internet, or simply just keep on your device.

Super Mario Run launched for iOS

The eagerly-awaited Super Mario Run game has been launched for iOS by Nintendo. The game takes the Super Mario Bros format, where the character sprints from left to right, collecting coins, jumping over obstacles and squishing enemies, and tweaks the game play to make it easy to play one-handed on a touchscreen.

Enable fingerprint actions using Fingerprint Gestures

Fingerprint Gestures app allows you to configure your device so that it reacts when you tap, double-tap or touch it. Among the possible actions, you can choose to associate an action with a button, to open the notifications panel, manage music and more. It requires Android device running Marshmallow or higher with a fingerprint sensor. A fingerprint sensor is supported if the device manufacturer has implemented Google's fingerprint API.

Ivy, the sidebar launcher

Ivy allows you to access your favourite applications instantly, from any application. Simply grab the menu bar on the right side of your screen to open it. You can configure it to access not only shortcuts to applications but also to different information. By default, the launcher is on the right, and has a white background. You can make various changes, including changing the background or transparency.
