TEST & MEASUREMENT

Microwave motion sensor

BlackT Electrotech has introduced a lighting automation device that saves electricity. Basically, a microwave motion sensor, this device works by detecting any movement more accurately than PIR sensors. It can easily connect with existing lighting. The device has a wide operating range, and can detect outside glass or other thin material.

Voltage testers

The three models in Testo 750 voltage tester family have an all-round LED display. The display can be seen from any position, thanks to its unique fibre optics. All the models meet the latest voltage tester standard EN 61243-3:2010 and

CAT IV safety specification.

These are capable of voltage testing, continuity testing and rotating magnetic field measurement. Model 750-2 is also suitable for single-pole voltage testing, while model 750-3 is fitted with an L-C display to show the current reading.

True RMS multimeter

The FLIR DM90 is an affordable true-RMS digital multimeter with a type-K thermocouple. Equipped with features like LoZ, VFD mode and μ A current measurement, it is ideal for electricians, service technicians and

HVAC professionals. The multimeter has a built-in worklight, non-contact voltage detector, and intuitive and simple-to-operate user interface. It includes functions for DC voltage, AC voltage, DC current, AC current, resistance, type-K thermocouple contact temperature, capacitance, frequency, diode and continuity.

Bare board testers

MSB Electronics has introduced UTRON high-speed bare board testers (UT8000HV6 and UT8008HV) for all types of PCBs. The testers include 1024 to 12,288 test points, and allow continuity and leakage testing with 250V test

voltage, maximum 20mA test current and 2048 points/second test speed.

Battery capacity analyser

Automatic battery analyser BCA 6/12 from Aplab enables instant analysis of any 6V or 12V lead-acid battery from

2Ah to 100Ah, including SLA, GEL or flooded type batteries. Its digitally controlled test process instantly shows the battery voltage, internal resistance and, most importantly, the remaining balance of the stored battery energy (Ah capacity) as the percentage of its Ah rating. The robust 100A rated battery clamps have four-terminal test capability to provide highly accurate testing.

Digital thermo anemometer

Kusam Electrical has introduced a low-cost, portable digital thermo anemometer (model KM909) that simultaneously displays wind speed and temperature, and stores maximum, minimum and average values. The meter can measure temperatures from -20°C to 60°C (with a speed of one measurement every second), and wind velocity in the range of 0 to 30.0 m/s.

PV insulation earth tester

Kyoritsu 6024PV is a 4-in-1 tool that can do PV insulation, insulation and earth testing as well as voltage
