

ers with IP67 ingress degree of protection for rough applications. The snap-in fuse holders guarantee fast and tool-free assembly. The carrier is available in both versions with slot and finger grip and can accommodate $5 \times 20\text{mm}^2$ or $6.3 \times 32\text{mm}^2$ fuse sizes.

FRAM chips

Fujitsu has unveiled two new FRAM chips that work over extended operating temperatures of up to 125°C and comply with industry standard AEC Q100. The MB85RS128TY and MB85RS256TY FRAMs allow instant and continuous data storage in applications such as air bag data storage, event data recorders, battery manage-

ment systems, automatic driving assistance systems, and navigation and infotainment systems.

Ultra-low-noise switching power supply

Brilliant Electro-Systems has introduced Japan-based Daitron make LFS150A series AC/DC switching power supply. This compact, lightweight power supply provides clean DC power with a complex resonant

converter. It keeps leakage current, conducted emission and radiated emission low. The power supply is suited for noise-sensitive applications like equipment used in advanced hyperfine measurement, testing, and medical and biotechnology fields.

Output power supply

Mornsun has introduced HO1 series of high-voltage output power supply for portable ultrasonic devices like ultrasonoscopes, pile test instruments, ultrasonic thickness gauges, and non-metallic ultrasonic testing detectors.

These power supplies feature 12V fixed input voltage, 0-600V continuous output with linear adjustable function, operating temperature ranging from -40°C to $+85^\circ\text{C}$ without any derating, and temperature coefficient up to $\pm 0.01\%/^\circ\text{C}$, time coefficient up to $\pm 0.05\%/ \text{hour}$, and output ripple as low as 15mVp-p (typically).

TOOLS & EQUIPMENT

Intel 8051 kit

ARTECH Electronics has introduced an Intel 8051 kit that covers complete peripheral solutions for embedded processor 8051. Other features include easy replacement of faulty ICs or components, reprogrammable zip socket facility, separate 5V and 12V supplies, RS232 serial communication, DC motor, stepper

motor, eight LEDs, four switches, two 5V relays, seven-segment display, and software support for RIDE and Willar Programmer.

LED drivers

Brisker's new LED30W-D series constant-current drivers are designed for use with standard 0-24V dimmers.

These drivers feature a less than 10 per cent to 100 per cent dimming range and universal 100-277V input. IP66 thermal-advantage plastic housing makes them suitable for use in damp locations.

Fixed VoIP gateway

Matrix has added a new variant to its VoIP gateways category 'SETU'. The VFX844 fixed gateway supports up to eight VoIP channels, four FXO ports and four FXS ports. Tailored mainly for the international market, it offers features like caller ID on analogue stations, emergency dialing and hotline extension setting. SETU VFX844 is based on TLS and SRTP protocols, ensuring security of communication routed on the platform.
