

MEDI's choco-MPPT

High efficiency drop-less SMR (Switch Mode Rectifier)

This is a PWM buck MPPT with SMR technology, no diode drop during flyback energy transfer for improved efficiency.

Highlights –

- Auto tracking with tracking efficiency > 99%
- 12V /24V /36V /48V automatic selection
- Temperature compensated charging
- Output and input current limiting at 25A
- Auto-select battery and panel
- Separate battery current limiting
- LED and LCD
- LCD for all parameters including KWH
- Wifi connectivity to android
- Dusk to dawn (optional)

Protections :

- Battery reverse
- Panel reverse
- Battery high voltage (up to 400V)
- Panel high voltage (up to 400V)
- Battery & panel reverse same time
- Battery & panel high voltage same time
- Both battery & panel are high & reverse same time
- Overload and Short circuit

MEDI's 500W choco-MPPT – Rs.3700

Contact MEDI to order your sample today!

Automatic panel and battery selection – If you connect a 12V /24V / 36V / 48V battery or panel 40V /80V / 160V , the resistance divider will automatically change to get the maximum scaling in that voltage.

When battery and panel are connected there is zero current which means no spark during contact. No surge current while connecting battery and panel.

Charger active signal provided for priority solar charging for integrating with MEDI's sine wave inverter

All on-board power supply is through SMPS, making it drop-less and heat-less.
