

Narrowest level-controlled pulses, lowest phase noise and highest output power on the market

When testing and measuring products that are designed to work at the utmost technological limits, only the best signal can show you the true performance of your product. The R&S[®]SMA100B gives you all you need to achieve a decisive advantage: signals with lowest phase noise, highest output power with lowest harmonics and narrowest level-controlled pulses down to the nanosecond range.
