

Rugged LDMOS & GaN-SiC RF power transistors

Radar, commercial avionics, ISM applications

Infineon's latest generation of RF Power products enable the design of compact, broadband and efficient RF power amplifiers.

Our LDMOS & GaN-SiC technologies provide the most advanced, rugged, and stable solutions for pulsed and CW applications.

Highlights:

- › 450 MHz to 3100 MHz
- › 5 W to 1400 W
- › High ruggedness & efficiency
- › High RF consistency
- › Broadband performance
- › Reference designs
