

Sealed Energy Systems

SPONSORED SECTION

Established in 1991, Sealed Energy Systems (SES) is a leading designer and manufacturer of customised batteries, battery packs and chargers that enable portable electronic products to be more dependable, smaller, lighter and long lasting. Sealed Energy Systems' engineers have developed complete power solutions with unmatched quality. With more than 26 years of experience, the company's product portfolio, which addresses a wide range of applications, includes the following:

- Lithium-ion batteries
- Nickel metal hydride batteries
- Nickel cadmium batteries
- Chargers
- Valve regulated lead acid batteries
- Battery management systems

The company also offers rapid prototyping services for new projects – covering batteries, chargers and battery management circuits. Equipped with a comprehensive tool room, CAD designing facilities and electronic schematic design and development facilities, the engineering team can design products rapidly and to the widest range of customisation demands.

SES has a comprehensive testing facility with the following equipment:

- Capacity tester
- Life cycle tester
- Impedance tester
- MCU based charger/discharger
- Environment test facility (ETDC)

Sealed Energy Systems is SSI/SME as well as NSIC registered, ISO 9001: 2008 and CE certified, and also CRISIL rated.

Future Hi Tech Batteries Ltd

SPONSORED SECTION

Established in 1988, India's first lithium-ion cell and battery pack manufacturing unit was set up by prominent technocrats and scientists at Mohali, Punjab. It was later acquired in 2012. With a fresh infusion of funds, the facilities were upgraded, converting the plant into a world class lithium-ion battery unit by integrating up-to-date technology.

Currently, the company manufactures more than 800 types of 1 ~ 32S battery packs, including over 30 types of BMS with SMBUS (I2C, HDQ Port), which have wide application in almost all kinds of battery packs.

Technical strength

Future Hi Tech Batteries has a pool of talent with vast experience in the field. The management team and mentors include doctors, electro-chemists, electrical and electronic engineers and management professionals. Many of them come from prominent institutions like IIT Patna, Kharagpur and CERI.

Production, testing and R&D

The company has vast in-house manufacturing, testing and R&D facilities to design, develop and produce lithium energy storage solutions and even fully customise products as per clients' requirements. All products pass through stringent quality and aging checks to deliver optimum results with the best possible life span. The in-house set-up of installed machinery for production, testing and R&D has been procured from the world's best machine makers.

Product range

- Cells: Lithium-ion • Lithium Ferro Phosphate (LFP)
- LIPO • Cylindrical, polymer and prismatic

Portable range

- Rechargeable cells – AA & AAA • UPS systems • Inverters

Other products

- BMS/PCM • Power banks • Handheld search lights
- Mobile phone and computer accessories

Looking for Electric Rickshaw Battery ?

Rugged Lithium-Ion EV Battery

SE14EV80 - 48V, 80AH

SES SEALED ENERGY SYSTEMS
72, HSIDC Industrial Estate, Ambala Cantt - 133006, Tel : +91-171-2699054
E-mail : info@sesbatteries.com, Web : www.sesbatteries.com

SAY NO TO POLLUTION

Key Features

- 60 km / hour top speed
- 80 km / charge range
- 1,500 Motor Output (Watt)
- Lithium battery
- 10 inch x 3 inch Wheel Diameter
- Electric bike charger
- 3 hours Battery Charging Time

We have Other 3 Models as well.

STORM ZX
SPORT -63
ELEKTRIKA-48
