

New STM32L4 MCUs lead the pack in performance, power, and peripherals

New STM32L4 MCUs
from STMicroelectronics
Lead **Ultra-Low-Power**
Class in Performance
and Efficiency with **Top**
Peripheral Integration

The latest STM32L496 and STM32L4A6 microcontrollers (MCU) from STMicroelectronics extend the unique fusion of ARM® Cortex®-M4F core performance and proprietary ultra-low-power technologies, adding larger memories, enhanced graphics support, extra peripherals, and increased power-saving flexibility.

key features

Bigger on-chip RAM, now up to 320 Kbytes

1 Mbyte Flash, CAN interface, camera interface and crystal-less Full Speed (FS) USB OTG

High-pin-count UFBGA169 package option

ST Chrom-ART Accelerator™ graphics engine for smoother display performance in energy-conscious applications

STM32L4A6 with hardware cryptographic acceleration implementing SHA-256 and AES-128/192/256 algorithms

STMicroelectronics Pvt Ltd

Plot No 1, Knowledge Park III,
Greater Noida 201308, Uttar Pradesh, India
