can test the prototype for proper working of both the mechanical and electronic parts.

Other than regular in-built features, customers need to specify inner layers of the stack, material's temperature strength and other such features to get the PCB customised to their requirements. This information helps to avoid conflicts with customers, making Pad2Pad a professional and reliable platform. Pad2Pad prototype and production services also follow IPC standards for safety requirements.

An all-in-one package

You can design, fabricate and even assemble with Pad2Pad. This free simulation tool also comes with customer support, which is a special advantage to designers. **EFY**
