

DYNA – iDCS

Industrial / DCS / SCADA Trainer with wireless Intelligent Controller

Delivering one of the best designed Industrial Distributed Control System to train young students and the future of India.

Dyna-iDCS is designed around ADAM-3600, an Intelligent Remote Controller with multiple wireless function capability, multiple I/O selection, wide temperature range & support flexible communication protocol for real world industrial applications. The Intelligent RTU controller has logic capability of usual PLC as well as latest advanced features for DCS.

The ADAM-3600 is designed for use in the Internet of Things (IoT) for Remote diagnosis, Maintenance, Visual management & Strategy Development. Dyna-iDCS can also be seamlessly Integrated with SCADA for Remote Monitoring & Control.

Ease of Experimentation and Learning for students is achieved by mounting the controller on a panel with easy access to all signals. Modular Breakout Panels for easy interfacing with simulated I/O's & with Plug in Modules (PIM's) for performing various experiments are also provided. Process mimics as well as real world applications also connect with Dyna-iDCS. A suitable software package used in the industry for configuring the controller and PLC Programming languages is also included in the package.

- Intelligent Industrial controller mounted on ESD protective Workbench
- On-board 24V 6A Power-Supply
- I/O Signals brought out on breakout panels for interfacing
- PLC Programming IEC-61131-3 standards with KW-Multiprog
- Provision for Industry standard DIN-rail mounted units
- Examples for PLC Programming & LabVIEW based Experiments Included
- Ergonomic Design with Ease of Interfacing
