

through the Internet, AI enables the machines to figure out when to turn on or modulate devices around you, based on your previous interactions with them.

Cyber Security. What is more dangerous than machines that have the capability to think and control other machines? Machines that can be hacked and controlled by malicious fringe elements! This topic focused on how to prevent this.

IoTShow.in: Industrial Internet of Things (IIoT). The one area that sees the most activity in terms of directly implemented IIoT deployments is the IIoT, or Industry 4.0. This track looked at the technologies and services that power the IIoT.

IoTShow.in: Smart Humans (Medical IoT). What if the highly-scalable intelligence and control of the IIoT can be used to increase a human being's life span and quality of life? That is what our smart humans track explored.

IoTShow.in: Smart Homes and Cities. Smart cities and e-governance have the capability to completely revolutionise and improve our nation. This conference covered talks that focused on e-governance, smart villages and more.

IoTShow.in: Profit from the IoT. No business model survives unless it figures out how to profit from its operations. This conference looked at how the IoT can improve efficiencies enough to improve profit margins, or move a business from red to black.

IoTShow.in: Smart Automotive. Smart cars and connected vehicles have the potential to change transportation completely. This track looked at various technologies that are available as well as the products and services that can help those building solutions for this sector.

Electronics Rocks. Our ever-popular event for design engineers was back. With a treasure trove of 20+ amazing workshops, the event truly rocked, with most workshops running at full house.

Buyer-Seller Meet

This event provided a unique platform for exhibitors to meet 11 large buyers of electronic products, components, manufacturing equipment, LED lighting components and IoT hardware, among others. This year more than 100 meetings took place between buyers and sellers, over a period of three days.

Buyers' FEEDBACK

"This is the fifth time I have participated in EFY Expo. Since the last five years we have been able to find a lot of good suppliers in India. Currently, we are working with about 25 global and Indian suppliers that we got through EFY, from product/service categories like metal sheets, connectors, ESD and cleanrooms. I wish to continue participating in this event to meet more suppliers and to learn about new technologies."

Shanaka Perera, purchase manager, Varisystems Pvt Ltd

"This is a very good platform for buyers and sellers. It is more focused than the meetings we have in our office or at other places."

Manoj Dhawan, assistant general manager, Luminous Power Technologies

"With 'Make In India', such platforms where buyers can meet sellers have become essential for both. It is difficult to bring people having the same understanding together and to approach intangible benefits. I feel this type of forums should come up in bigger ways, both implementation and application wise."

Gururaj V. Hiremath, senior deputy general manager (CSC/IED-CMS), Bharat Electronics Ltd

"It is a great approach and is really impressive. This is my first time here, and I found it to be really good."

Sai Vinesh, manager, Tecno Systems India Electronics Pvt Ltd

"One-on-one meetings are very important, especially at the start of a financial year. I had a good response while talking to suppliers here because they will be talking to their principals and giving us some numbers so we can start finalising things by April first week. This forum is really good for such activities. I am quite satisfied; I met the right sellers and at the right time."

Narayan Kumar J., managing director - technical, Sanjay Technologies

Exhibitors' FEEDBACK

"We have been participating in EFY events for last six to seven years. This event has been very good for us, and we eagerly look forward to come back next year."

Chris Palin, EMEA manager, HumiSeal

"Thanks EFY for organising this wonderful exhibition! We came across some serious visitors. We wish to push our legs into the industrial segment, and have got some contacts from the industry segment."

Manish Joshi, Scientech

"IEW is a good platform for having quality conversations with customers. This time there was a lot of IoT talk. Quality of conversation was very good this time!"

Amit Agnihotri, marketing manager, RS Component

"The show has been great this time! We came across a lot of manufacturers, suppliers, customers and IoT startups. The conferences were very informative. Overall, it was a very good networking event."

Ranga Prasad M.A., director, Semikart

"We participated for the first time. I am very happy to be a part of this wonderful show. The reach and personal touch of EFY team gave us a lot of comfort and has made us want to exhibit with EFY again."

Rashi Gupta, director, Vision Mechatronics

"As far as the event is concerned, we saw quality this time, which is very important to us."

Sanjay Malla, chief executive officer, Toradex
