Kingston unveils SSDs

Enterprise-class reliability with advanced data protection

Kingston has announced Data Center 400 (DC400) SSD, the latest solid-state drive to its range of enterprise solutions. DC400 SSD is an entry-level enterprise drive designed for server use in data centres, especially for customers who deploy a

rip-and-replace strategy. It is ideal for read-intensive applications such as boot, Web servers and lower data rate operational databases and analytics—especially in data centre

mixed-workload environments where endurance and reliability are important.

OPPLE introduces innovative light for children

A unique star-shaped light with marvellous light effects

Twinkle Star, Opple's newest addition to their range of home luminaries, has been designed keeping in mind the company's healthy lighting motto. It protects a child's sensitive eyesight by ensuring maximum visual comfort. The light comes fitted with a three-level brightness switch dimmer that controls brightness in the room. Its six-colour decorative sensor dimmer makes the environment beautiful and relaxing. This product is enabled with a power capacity of 33W and comes in white colour with yellow edges.

ASUS launches ZenBook UX330

Supremely thin, enduringly elegant

ZenBook UX330's elegant aluminium-alloy unibody chassis is 13.5mm thin and weighs only 1.2kg. With up to 12 hours battery life, ZenBook UX330 takes even the longest working day in its stride. The laptop has more than enough performance to cope with all your on-the-go productivity needs, with a powerful 7th-generation Intel Core i7 processor. The wide-viewing-angle display is a real treat for your eyes, too, with its pin-sharp 3200 × 1800 resolution enhanced by exclusive ASUS Splendid and ASUS TruLife technologies for vivid, life-like colours and clear, sharp videos.

Video door phones from Panasonic

Laced with characteristics like wireless and smartphone connectivity options

Panasonic has expanded its video door phone portfolio with the launch of VL-V590 and VL-V900 in the market. The products are designed to enhance the surveillance and security needs of consumers, and come bundled with features like location monitoring, electric lock release, multiple household connectivity and wireless connectivity.

VL-V590 comes embedded with characteristics like electric

lock release and a connectivity of up to 20 households. It enables the connection of any combination of 17.8cm (7-inch) wired monitors and six wireless monitors with intercom calling facility, respectively.

VL-V900 is a multi-door video intercom system, a combination of PBX and cameras that can connect up to 18 lobby stations and 560 monitors for large apartment buildings. It follows the concept of the Internet of Things, and enables you to answer the visitors after looking at them through the connected smartphone. The phone lets you record images of visitors, monitor common surveillance rooms and notify accidents to the reception or another station via a PBX.
