

Get Light of 18W LED Tube in Just 12W Only!

Now Switch To 4-foot T-8

ULTRA HIGH EFFICIENCY
PowerLED Tube Light
(Power Consumption 12W only; SAME light output)

ULTRA HIGH EFFICIENCY

33%

Lower Power Consuming

MOST EFFICIENT POWER RATING LED TUBE LIGHTS IN THE MARKET!

While most comparative competitive LED tubes achieve a lumen output of 1600 lumens at 18W approx., the **BINAY ULTRA HIGH EFFICIENCY QUADRA-12-ES PowerLED Tube Light** is designed for 2000 source lumens at a 33% lower power consumption of 12W, thus achieving considerable power savings (apart from much longer maintenance free life). The light output performance is equivalent to that of the 1200mm T8 fluorescent tube.

5 YEARS Warranty WITH AN ESTIMATED LIFE OF 12-15 YEARS

POWERING LED TECHNOLOGIES WORLDWIDE SINCE 1983

Fig. 2: A single-line batch file

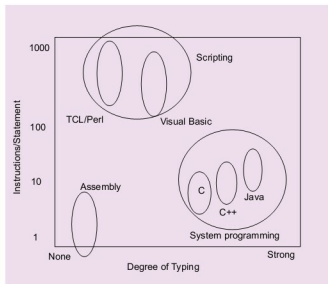

Fig. 3: Functionalities of different computer languages

In information technology, Python is one of the scripting languages used for carrying out tasks from local machines to servers and the Internet. Perl, PowerShell and other scripting languages help testing and debugging errors from programs. Scripts help automate the process of searching and suggesting solutions for syntax or semantic errors. Data crunching and providing meaningful results is possible with minimal efforts using scripts.

Architectures, structures and buildings are designed using computer-aided technologies like computer-aided design and computer-aided manufacturing tools. Tools like SolidEdge and AutoCad use VBScripts for designs.

In the article 'Scripting: Higher Level Programming for the 21st Century,' from *IEEE Computer* magazine, March 1998 issue, John K. Ousterhout describes how scripting languages glue applications. Interdisciplinary researches require coding, which is indifferent across applications, hence reducing the necessary time to market for products.

Fig. 3 by John K. Ousterhout describes the functionality of different computer languages. In a strongly-typed language, the programmer declares how each piece of information will be used, and the language prevents the information from being used in any other way. Instructions/statements present the number of machine instructions carried out by a particular statement.

IT'S TIME TO PROMOTE

DESIGN IN INDIA

<http://designindia.electronicsforu.com>

Design IN India

Section launched on Electronicsforu.com to showcase design houses and innovators of India who are creating innovative electronic hardware products. If your firm has also launched or designed an innovative product for OEMs, share your details with us at editsec@efy.in.

An **EFY GROUP** INITIATIVE
