Google, MeitY announce digital awareness initiatives

Google and Ministry of Electronics and Information Technology (MeitY) have announced Digital Payment Security Alliance initiative that aims to create community awareness on safe and secure digital practices. Under this initiative, banks, Fintech companies and the government will work together to create awareness as users adopt digital and mobile payments.

EY to open first AI centre in Mumbai

London-headquartered professional services firm EY is set to open its first artificial intelligence (AI) centre in Mumbai to help its clients figure out the best way to use these emerging technologies. The centre will bring together teams of multi-disciplinary practitioners, combining expertise in areas such as AI, robotics, machine learning and cognitive technology, along with domain experience in sectors.

Samsung, Intex are top OEMs in India

Samsung, Intex and Rising Star are the top three original equipment manufacturers (OEMs) in India, according to market research firm CyberMedia Research. According to the report, 48 OEMs and third-party manufacturers made mobile handsets in India during the fourth quarter of 2016 and 40 original design manufacturers (ODMs) supplied to brands selling in India for the same period.

IIT Patna launches incubation centre

The incubation centre, nestled within the sprawling campus of IIT Patna, is a not-for-profit institution that focuses on innovations through startups and projects based on electronic system design and medical electronics. The project is associated with Make in India initiative and has received funding from MeitY and the government of Bihar.

Cisco to make India hub for global hardware export

Networking giant Cisco has plans to make India a global export hub for its products, after recently having started manufacturing access points and routers at a facility in Pune. The USA based company also expects to complete 50 digitisation projects by the end of the year across India, which is part of its US\$ 100 million investment announced last year.

Russian firms invest US\$ 80 million in solar power project

Miyota Power India, a joint venture of two Russian firms, has tied up with Chennai based AI Ameen Green Energy to set up a 100MW solar power plant near Virudhunagar in Tamil Nadu. Miyota Power will be investing US\$ 80 million in the project.

product called IBM Blockchain was the first service for developers to build enterprise-grade technology using Hyperledger Fabric, the first code set to be released by the open source group.

Fabric Blockchain can process more than 1000 transactions per second and has the necessary features to be used by large enterprises to build their applications.

The company is working with technology company SecureKey Technologies and a group of Canadian banks to build a digital identity network using its Blockchain services.

The network, to be launched

later in the year, is aimed at making it easier for consumers to prove their identities when accessing services such as new bank accounts, driver's licences or utilities.

IBM has also tested a Blockchain based asset management platform for carbon assets with Chinese company Energy-Blockchain Labs. The companies aim to release the platform, built using the new IBM Blockchain, later this year.

Bharti Airtel to acquire Tikona Networks' 4G business

Bharti Airtel has entered into an agreement with Tikona Digital

Networks to acquire the latter's 4G business including Broadband Wireless Access spectrum and 350 sites, in five telecom circles. The acquisition is subject to requisite regulatory approvals.

Tikona currently has 20MHz spectrum in 2300MHz band in Gujarat, UP (East), UP (West), Rajasthan and Himachal Pradesh circles. Airtel plans to roll out high-speed 4G services on the newly-acquired spectrum in the five circles immediately after the closure of the transaction.

As per the agreement, acquisition of the 4G business in Gujarat, UP (East), UP (West) and Himachal Pradesh will be undertaken by Airtel, while in Rajasthan circle it will be accomplished through Airtel's subsidiary Bharti Hexacom Ltd. Post-acquisition, the combined spectrum holding of Airtel in these five circles will be within the spectrum caps prescribed by the government.

Hindustan Power contributes 10 per cent to Bihar's installed solar capacity

The clean energy arm of Hindustan Power had commissioned a 10MW solar plant at Shergati, Gaya, in Bihar to power the cumulative solar capacity in Bihar to ~100MW. The plant, commissioned at an investment of ₹ 810 million, is spread over 56 acres of land using 34,920 modules. It has been generating 45,000 units of clean energy per day since its commissioning in November 2016. The PPA for the 10MW project has been signed with Bihar State Power Holding Corp. Ltd, and the power is evacuated to 33kV Shergathi sub-station.

With a current solar capacity of ~600MW, the company is one of the key players championing the adoption of solar on mass scale in India. The clean energy arm of the company is generating carbon savings of approx 720,000 tonnes per year.
